IDOT PROJECT LABOR AGREEMENT DETERMINATION

o: Affil L. Schneider, Secretary
rom: William R. Frey, Interim Director
pate: November 28, 2011
e: FAI 57 (I-57 Resurfacing), Contract Number 74467, Shelby County
{January 20, 2012}
a accordance with Executive Order 2010-03 (Quinn), it is recommended that a project abor agreement (PLA) be utilized for the above-captioned Project. This ecommendation is based on the considerations indicated below.
∑ 1) The Project is being awarded and administered by IDOT (i.e., not by another overnmental agency).
2) The Project is being constructed using state or local funds only (i.e., no federal ands).
∑_ 3) The overall size, scope, sequencing, logistics or other aspects of the Project take it particularly challenging to manage, and use of a PLA is expected to help assure at the construction work is performed properly and efficiently under the circumstances.
∑ 4) The duration of construction activity on the Project is expected to exceed one enstruction season (i.e., 110 or more working days), or the nature of the Project results a heightened need for labor force continuity and stability over a substantial period of me.
5) There is a firm construction completion date established for the Project thereby acreasing the adverse consequences of any work stoppage or other labor disruption.
∑_ 6) The time required to complete the Project is expected to extend beyond the expiration date of one or more existing collective bargaining agreements covering trades kely to be involved in the Project, thereby increasing the likelihood of work stoppage(s) to other labor disruption(s) during construction of the Project.

FAI 5/ (I-5/ Kesurtacing) Contract Number 74467 Shelby County Item

8) This will ensure la concern.	project presents specific safety concerns to the traveling public and a PLA, bor force continuity and stability, decreasing the length of the safety
	of a PLA is expected to result in improved access to skilled labor, improved improved safety performance on the Project.
	of a PLA on the Project is not expected to have a material adverse effect on ve bidding process.
the ability of disadvantage	of a PLA on the Project is not expected to have a material adverse effect on the Department to achieve other Departmental goals (e.g., utilization of d businesses, utilization of Illinois domiciled businesses, development of tendor alternatives over time, etc.).
12) The	re are other material considerations favoring or disfavoring use of a PLA on s follows:
on this Project faith a PLA v specifications	the identified considerations, we recommend that you approve use of a PLA et. Upon your approval, the Department shall undertake to negotiate in good with the relevant labor organization(s), and shall include in all necessary bid and other documents information regarding the actual or form of PLA that upon all contractors and their employees.

Attachment A:

Justification for the use of Project Labor Agreement on Contract # 74467, Shelby County

The use of a Project Labor Agreement on this project is consistent with all State and Local statutory and regulatory requirements.

Item 2: This project is federally funded with a state match.

Item 3: The Estimated Cost of this Project is \$13,967,000.

The work on this project is located on FAI Route 57 from the Effingham-Shelby County Line to the US 45 interchange in Neoga. The average daily traffic at this location is 17,400 with 25% (4400) trucks. In order to complete the mainline I-57 Interstate resurfacing project without any adverse traffic delays for the traveling public or delays in commerce, IDOT feels a Project Labor Agreement in necessary for this project.

The work on this project consists of 8.5 miles of %" milling, 1-1/2" HMA surface course, 2-1/4" HMA binder course, pavement patching, guardrail removal and replacement, pavement marking, HMA curb removal and replacement and any other work necessary to complete this project. With the large number of different construction trades that will be involved in the resurfacing of this section of roadway, IDOT feels the use of a Project Labor Agreement is necessary to avoid any labor related delays.

The resurfacing work involves various construction sequences creating numerous traffic control challenges. The contractor will need a reliable work force to complete the work in a timely manner which will maintain safe travel for the traveling public during all stages of traffic control. It is IDOT findings that the large skilled workforce needed to meet all the challenges with this project can be provided by the union trades involved and is a necessary requirement for a Project Labor Agreement.

With no construction in the project limits the speed limit is 65 MPH. Once the projects limits are under construction the speed limit will be 45 MPH. Based on user cost of \$10.00/hour for passenger vehicles and \$20.00/hour for trucks, a user cost of \$5,962/day will incur due to any work stoppages. Based on the adverse travel due to construction zones, IDOT feels the use of a Project Labor Agreement is necessary to avoid any Labor related delays.

Item 4: There are 100 working days to complete the project. This is close to a full construction season, so any labor issue could cause the project to continue into a second construction season. A Project Labor Agreement would ensure the stability of the work force allowing the work to be completed in the time allotted.

<u>Item 6:</u> This project will extend beyond the expiration date of the collective bargaining agreements with the following locals.

Carpenters Local 634 – contract expires 4/30/2012 Teamsters Local 26 – contract expires 6/30/2012

If the work is delayed into a second construction season, the projects could extend beyond the expiration date of the collective bargaining agreements with the following locals.

Operators Engineers Local 965 – contract expires 04/30/2013 Laborers Local 159 – contract expires 4/30/2013 Iron Workers Local 46 – contract expires – 4/30/2013
