GENERAL NOTES

1. SEEDING SHALL NOT BE PERMITTED AT ANY TIME WHEN THE GROUND IS FROZEN, WET, OR IN AN UNTILLABLE CONDITION. LOCATIONS TO BE SEEDED WILL BE DETERMINED BY THE ENGINEER.
2. ALL ELEVATIONS REFER TO U.S.G.S. MEAN SEA LEVEL DATUM.
3. ALL DAMAGE TO TOWNSHIP, CITY, COUNTY OR STATE OWNED UNDERGROUND FACILITIES, CAUSED BY THE CONTRACTOR SHALL BE REPAIRED TO THE SATISFACTION OF THE ENGINEER AT THE CONTRACTOR'S EXPENSE. THIS SHALL INCLUDE ALL TEMPORARY REPAIRS REQUIRED TO KEEP THE FACILITY OPERATIONAL WHILE MATERIAL IS BEING OBTAINED TO MAKE PERMANENT REPAIRS. SPLICING OF ELECTRICAL CABLE SHALL NOT BE ALLOWED. ELECTRIC CABLE SHALL BE REPLACED FROM POLE TO POLE OR CONTROLLER.
4. EXCEPT WHERE MODIFIED BY THE SPECIAL PROVISIONS INCLUDED IN THE CONTRACT DOCUMENTS OR THE DETAILS IN THE PLANS, ALL CONSTRUCTION SHALL BE DONE IN ACCORDANCE WITH THE "STANDARD SPECIFICATIONS FOR ROAD AND BRIDGE CONSTRUCTION", ADOPTED JANUARY 1, 2012; THE "SUPPLEMENTAL SPECIFICATIONS AND RECURRING SPECIAL PROVISIONS", ADOPTED JANUARY 1, 2014; THE LATEST EDITION OF THE "ILLINOIS MANUAL ON UNIFORM TRAFFIC CONTROL DEVICES FOR STREETS AND HIGHWAYS", THE "STANDARD SPECIFICATIONS FOR WATER AND SEWER MAIN CONSTRUCTION IN ILLINOIS" MAY 1996 FIFTH EDITION; THE "DETAILS" IN THE PLANS; AND THE "SPECIAL PROVISIONS" IN THE CONTRACT DOCUMENTS.

   ANY REFERENCE TO STANDARDS THROUGHOUT THE PLANS OR SPECIAL PROVISIONS SHALL BE INTERPRETED AS THE LATEST IDOT STANDARDS.
5. IT SHALL BE THE CONTRACTOR'S RESPONSIBILITY TO UNDERSTAND THE SOIL AND GROUNDWATER CONDITIONS AT THE SITE. THE STRUCTURE GEOTECHNICAL REPORT IS INCLUDED IN THE PROJECT SPECIFICATIONS FOR REVIEW AND INFORMATION.
6. BEFORE STARTING ANY EXCAVATION, THE CONTRACTOR SHALL CALL "JULIE" AT 1-800-892-0123 FOR FIELD LOCATIONS OF BURIED ELECTRIC, TELEPHONE AND GAS FACILITIES (48 HOUR NOTIFICATION IS REQUIRED).
7. THE CONTRACTOR SHALL COORDINATE CONSTRUCTION ACTIVITIES WITH UTILITY COMPANIES, WILL COUNTY, AND CRETE TOWNSHIP.
8. THE CONTRACTOR WILL NOT BE ALLOWED TO SET UP A YARD OR FIELD OFFICE ON TOWNSHIP, CITY, COUNTY OR STATE PROPERTY WITHOUT WRITTEN PERMISSION FROM THE CRETE TOWNSHIP HIGHWAY DEPARTMENT.
9. THE ILLINOIS DEPARTMENT OF TRANSPORTATION IS NOT THE OWNER OF RECORD FOR THIS BRIDGE. THOSE SEEKING HISTORIC, AS-BUILT OR OTHER EXISTING DOCUMENTS MUST CONTACT THE OWNER OF RECORD TO MAKE ARRANGEMENTS FOR ACCESS TO THIS INFORMATION. OWNER OF RECORD:
   CRETE TOWNSHIP HIGHWAY DEPARTMENT
   ANTHONY RECUPITO, HIGHWAY COMMISSIONER
   25405 S. STATE ST., CRETE, IL. 60417
10. THE CONTRACTOR SHALL BE REQUIRED TO PROVIDE ACCESS TO ABUTTING PROPERTY AT ALL TIMES DURING THE CONSTRUCTION OF THIS PROJECT.
11. DO NOT SCALE PLANS FOR CONSTRUCTION DIMENSIONS. STATIONS ARE PROVIDED ON THE PLANS.
12. IT SHALL BE THE CONTRACTOR'S RESPONSIBILITY TO VERIFY ALL DIMENSIONS AND CONDITIONS EXISTING IN THE FIELD PRIOR TO CONSTRUCTION AND ORDERING OF MATERIALS.
13. THE CONTRACTOR SHALL USE CARE IN REMOVING OR EXCAVATING NEAR ALL EXISTING ITEMS WHICH WILL REMAIN. ANY DAMAGE DONE TO EXISTING ITEMS BY THE CONTRACTOR SHALL BE REPAIRED AT THE CONTRACTOR'S EXPENSE.
14. THE CONTRACTOR SHALL COMPLY WITH ALL REQUIREMENTS AT THE DIRECTION OF THE ENGINEER. THIS WORK IS INCIDENTAL TO THE CONTRACT.
15. CLEARING SHALL BE DONE TO THE CONSTRUCTION LIMITS OF THE PROJECT. SEE SECTION 201.01(A) OF THE STANDARD SPECIFICATIONS. CLEARING WILL NOT BE MEASURED FOR PAYMENT.
16. THE PROJECT HYDRAULIC REPORT CAN BE OBTAINED FROM THE CRETE TOWNSHIP HIGHWAY DEPARTMENT.
17. THE CONTRACTOR MUST RETURN ALL EXISTING MOT SIGNS TO CRETE TOWNSHIP FREE OF DAMAGE AFTER THE COMPLETION OF THE PROJECT. THIS WORK IS INCIDENTAL TO TRAFFIC CONTROL AND PROTECTION, (SPECIAL).
18. THE CONTRACTOR SHALL MAINTAIN AT ALL TIMES A 10 FOOT MINIMUM HORIZONTAL CLEARANCE FROM THE OVERHEAD COMED 12KV LINES. IF THIS MINIMUM CLEARANCE CANNOT BE MAINTAINED, THE CONTRACTOR SHALL REQUEST FROM COMED A POWER OUTAGE. COMED REQUIRES UP TO 16 WEEKS OF LEAD TIME FOR ANY OUTAGE. ANY NECESSARY OUTAGE WILL BE AT THE EXPENSE OF THE CONTRACTOR AND SHALL NOT IMPACT SCHEDULE.
19. PROJECT WORK HOURS:
   7 AM TO 5 PM - MONDAY THRU FRIDAY
   9 AM TO 3 PM - SATURDAY
   NO WORK ON SUNDAY

EROSION CONTROL GENERAL NOTES

1. THE CONSTRUCTION LIMITS WILL BE STAKED BY THE CONTRACTOR PRIOR TO COMMENCING CONSTRUCTION. PAYMENT FOR THIS WORK WILL BE INCLUDED WITHIN THE ITEM CONSTRUCTION LAYOUT, LS. THE CONSTRUCTION LIMITS MAY BE ADJUSTED BY THE ENGINEER TO PRESERVE TREES AND NO ADDITIONAL COMPENSATION WILL BE PAID TO THE CONTRACTOR FOR CHANGED CONSTRUCTION LIMITS. ALL WORK AND EQUIPMENT SHALL REMAIN WITHIN THESE LIMITS THROUGHOUT THE DURATION OF THIS PROJECT.
2. SEDIMENT AND EROSION CONTROL DEVICES SHALL BE FUNCTIONAL BEFORE THE PROJECT SITE IS OTHERWISE DISTURBED.
3. UNLESS OTHERWISE INDICATED, ALL VEGETATIVE AND STRUCTURAL EROSION AND SEDIMENT CONTROL PRACTICES WILL BE CONSTRUCTED ACCORDING TO MINIMUM STANDARDS AND SPECIFICATIONS IN THE ILLINOIS URBAN MANUAL REVISED 2012.
4. THE WILL-SOUTH COOK SOIL AND WATER CONSERVATION DISTRICT (WSCSWCD) MUST BE NOTIFIED ONE WEEK PRIOR TO THE PRE-CONSTRUCTION CONFERENCE, ONE WEEK PRIOR TO THE COMMENCEMENT OF LAND DISTURBING ACTIVITIES, AND ONE WEEK PRIOR TO THE FINAL INSPECTION.
5. A COPY OF THE APPROVED EROSION AND SEDIMENT CONTROL PLAN AND SWPPP SHALL BE MAINTAINED ON SITE AT ALL TIMES.
6. PRIOR TO COMMENCING LAND-DISTURBING ACTIVITIES IN AREAS OTHER THAN INDICATED ON THESE PLANS (INCLUDING BUT NOT LIMITED TO, ADDITIONAL PHASES OF DEVELOPMENT AND OFF-SITE BORROW OR WASTE AREAS), A SUPPLEMENTARY EROSION CONTROL PLAN SHALL BE SUBMITTED TO THE OWNER FOR REVIEW BY WSCSWCD.
7. THE CONTRACTOR IS RESPONSIBLE FOR INSTALLATION OF ANY ADDITIONAL EROSION CONTROL MEASURES NECESSARY TO PREVENT EROSION AND SEDIMENTATION AS DETERMINED BY THE WSCSWCD. THESE ADDITIONAL ITEMS ARE INCIDENTAL TO THE CONTRACT.
8. DURING DEWATERING OPERATIONS, WATER WILL BE PUMPED INTO SEDIMENT BASINS OR SILT TRAPS. DEWATERING DIRECTLY INTO FIELD TILES OR STORMWATER STRUCTURE IS PROHIBITED.
9. IT IS THE RESPONSIBILITY OF THE LANDOWNER AND/OR GENERAL CONTRACTOR TO INFORM ANY SUB-CONTRACTOR(S) WHO MAY PERFORM WORK ON THIS PROJECT, OF THE REQUIREMENTS IN IMPLEMENTING AND MAINTAINING THESE EROSION CONTROL PLANS AND THE NATIONAL POLLUTANT DISCHARGE ELIMINATION SYSTEMS (NPDES) PERMIT REQUIREMENTS SET FORTH BY THE ILLINOIS EPA.
10. PERIMETER EROSION CONTROL BARRIER SHALL BE ERECTED ADJACENT TO TEMPORARY CONSTRUCTION FENCE. THE RESIDENT ENGINEER SHALL HAVE FINAL DETERMINATION OF THE PLACEMENT AND LOCATION OF THE PERIMETER EROSION CONTROL BARRIER.
11. COMPLETED SLOPES (SECTION OF ROAD EMBANKMENT) SHALL BE SEEDED AND BLANKETED AS THE EXCAVATION PROCEEDS TO THE EXTENT CONSIDERED DESIRABLE AND PRACTICAL. UNDER NO CIRCUMSTANCES SHALL THE CONTRACTOR PROLONG FINAL GRADING AND SHAPING SO THAT THE ENTIRE PROJECT CAN BE PERMANENTLY SEEDED AT ONE TIME.
12. CLEANING OF VEHICLES AND EQUIPMENT SHALL BE PERFORMED IN A MANNER TO REDUCE THE AMOUNT OF POLLUTANTS TRIBUTARY TO STORM SEWERS AND OPEN WATERS TO THE MAXIMUM EXTENT POSSIBLE.
13. REFER TO STORM WATER POLLUTION PREVENTION PLAN FOR INSPECTION AND MAINTENANCE SCHEDULES, AND SEQUENCE OF ACTIVITIES.
14. ALL NECESSARY MEASURES SHALL BE TAKEN TO CONTAIN ANY FUEL OR POLLUTION RUN OFF. LEAKY EQUIPMENT OR SUPPLIES SHALL BE IMMEDIATELY REPAIRED OR REMOVED FROM THE SITE.
15. WHEN STREAM SHORELINE DISTURBANCE IS NECESSARY, THE STREAM SHORELINE SHALL BE STABILIZED WITHIN FORTY EIGHT (48) HOURS AFTER DISTURBANCE IS COMPLETED OR WORK IS INTERRUPTED.
16. WORK ALONG THE STREAM BANKS OF PLUM CREEK SHALL BE LIMITED TO PERIODS OF LOW FLOW. IF WORK MUST TAKE PLACE UNDER FLOWING CONDITIONS, THEN ADDITIONAL EROSION CONTROL MEASURES WILL BE NECESSARY AS DETERMINED BY THE WSCSWCD. THESE ADDITIONAL ITEMS WILL BE CONSIDERED INCIDENTAL TO THE CONTRACT.
17. THE USE OF HAY BALES IS NOT ALLOWED FOR EROSION CONTROL.

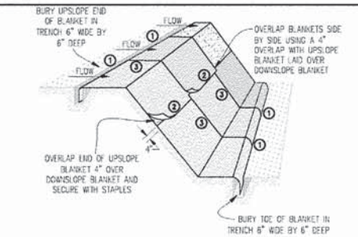
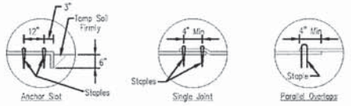
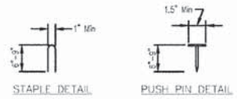
EROSION CONTROL BLANKET PLAN





DETAIL 1 DETAIL 2 DETAIL 3



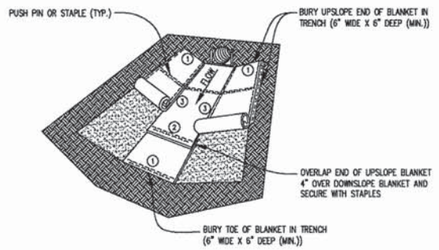
STAPLE DETAIL PUSH PIN DETAIL

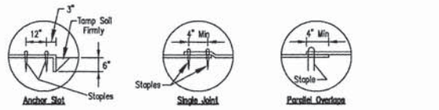
NOTES:

1. Staples shall be placed in a diamond pattern at 2 per s.y. for stiched blankets. Non-stiched shall use 4 staples per s.y. of material. This equates to 200 staples with stiched blanket and 400 stapels with non-stiched blanket per 100 s.y. of material.
2. Staple or push pin lengths shall be selected based on soil type and conditions. (minimum staple length is 6")
3. Erosion control material shall be placed in contact with the soil over a prepared seedbed.
4. All anchor slots shall be stapled at approximately 12" intervals.

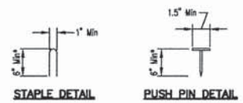
EROSION CONTROL BLANKET INSTALLATION DETAILS

EROSION CONTROL BLANKET - TURF REINFORCEMENT MAT (TRM)





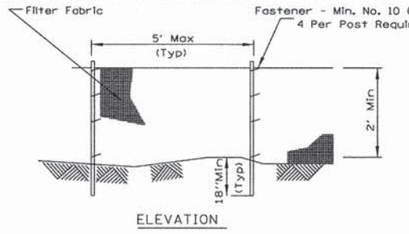
DETAIL 1 DETAIL 2 DETAIL 3



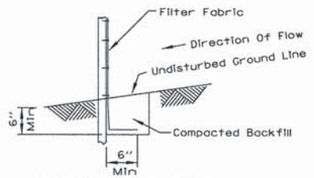
STAPLE DETAIL PUSH PIN DETAIL

*Note:
1. For sandy soil conditions, staple or push pin shall be a minimum 8 inches.

PERIMETER EROSION BARRIER PLAN



ELEVATION



FABRIC ANCHOR DETAIL

NOTES:

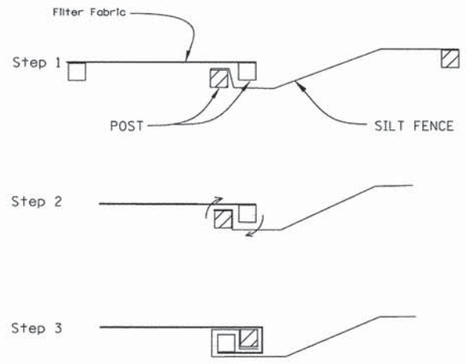
1. Temporary sediment fence shall be installed prior to any grading work in the area to be protected. They shall be maintained throughout the construction period and removed in conjunction with the final grading and site stabilization.
2. Filter fabric shall meet the requirements of material specification Article 1080.02
3. Fence posts shall be either standard steel post or wood post with a minimum cross-sectional area of 3.0 sq. in.

REFERENCE Project Designed Date Checked Date Approved Date

NRCS Natural Resources Conservation Service

STANDARD DWG. NO. IL-620 SHEET 1 OF 2 DATE 11-20-01

PERIMETER EROSION BARRIER



ATTACHING TWO SILT FENCES

NOTES:

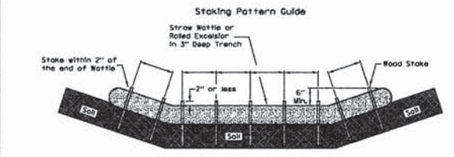
1. Place the end post of the second fence inside the end post of the first fence.
2. Rotate both posts at least 180 degrees in a clockwise direction to create a tight seal with the fabric material.
3. Drive both posts a minimum of 18 inches into the ground and bury the flap.

REFERENCE Project Designed Date Checked Date Approved Date

NRCS Natural Resources Conservation Service

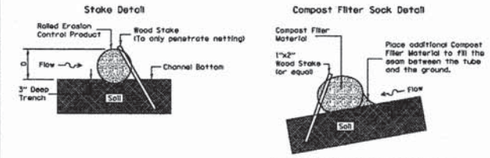
STANDARD DWG. NO. IL-620(W) SHEET 2 OF 2 DATE 1-29-99

ROLLED EROSION CONTROL PRODUCTS



Notes:

1. Overlap minimum is the diameter of the roll.
2. 4' spacing for wattles.
3. 2' spacing for rolled excelsior.
4. Or space according to manufacturer's specifications.



When compost filter sock ditch check is used, place a compost berm upstream of the filter sock (see IUM 805). A trench is not required.

Notes:

1. Drawings are not to scale.
2. Ends of wattles or rolled excelsior shall be turned at least 6" upslope.
3. Recommended stakes are 1 1/8" wide x 1 1/8" thick x 30" long
4. Stakes shall not extend above the straw wattle more than 2".
5. Spacing: The toe of the upstream ditch check shall create a horizontal line with the top of the downstream ditch check.
6. When compost filter sock ditch check is used, place a compost berm upstream of the filter sock (see IUM 805). A trench is not required.

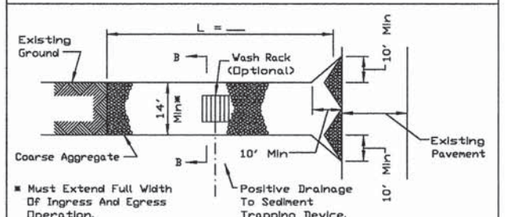
SIGN DETAIL

NOTES:

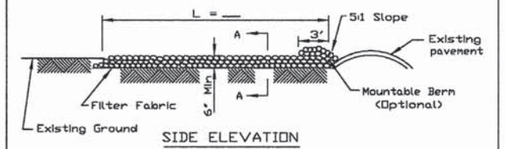
1. MAINTAINING TEMPORARY CONCRETE WASHOUT FACILITIES SHALL INCLUDE REMOVING AND DISPOSING OF HARDENED CONCRETE AND/OR SLURRY AND RETURNING THE FACILITIES TO A FUNCIONAL CONDITION.
2. FACILITY SHALL BE CLEANED OR RECONSTRUCTED IN A NEW AREA ONCE WASHOUT BECOMES TWO-THIRDS FULL.

TEMPORARY CONCRETE WASHOUT FACILITY - BARRIER WALL

STABILIZED CONSTRUCTION ENTRANCE PLAN



PLAN VIEW



SIDE ELEVATION

NOTES:

1. Filter fabric shall meet the requirements of material specification 592 GEOTEXTILE, Table I or 2, Class I, II or IV and shall be placed over the cleared area prior to the placing of rock.
2. Rock or reclaimed concrete shall meet one of the following IDOT coarse aggregate gradation, CA-1, CA-2, CA-3 or CA-4 and be placed according to construction specification 25 ROCKFILL using placement Method 1 and Class III compaction.
3. Any drainage facilities required because of washing shall be constructed according to manufacturers specifications.
4. If wash racks are used they shall be installed according to the manufacturer's specifications.

Benchmark: Chiseled square on NW wingwall against parapet wall, Sta. 12+47.11, 13.06' /Lt. Elev. 674.93 (NAVD88).

Existing Structure: SN 099-3351 was originally built in 1978 as Richton Road over Plum Creek and consists of a three span non-continuous W30x90 weathering steel beam superstructure on pile bent abutments and piers. The bridge is 124'-1½" back to back of abutments and 26'-0" out to out. Bridge was closed to traffic in 2012. Structure to be removed and replaced while traffic utilizes the existing detour.

Salvage: None

MARK R. BENDORF
081-006516
LICENSED STRUCTURAL ENGINEER
STATE OF ILLINOIS

EXPIRATION DATE 11-30-2014
DATE: 12/05/2013

I certify that to the best of my knowledge, information and belief, this bridge design is structurally adequate for the design loading shown on the plans. The design is an economical one for the style of structure and complies with requirements of the current AASHTO LRFD Bridge Design Specification.

GENERAL NOTES

1. Reinforcement bars designated (E) shall be epoxy coated.
2. Layout of slope protection system may be varied to suit ground conditions in the field as directed by the Engineer.
3. The embankment configuration shown shall be the minimum that must be placed and compacted prior to construction of the abutments.
4. Slip forming of the parapets is not allowed.
5. The existing bridge is closed to traffic and has a Sufficiency Rating = 29.0. Prior to starting the work, the Contractor shall submit to the Engineer for review and acceptance a Demolition Plan in accordance with Article 501 of the Standard Specifications.
6. The removal of the existing broken concrete under the bridge shall be included in the cost of "Removal of Existing Structures" and shall be done to the limits and depth of the proposed grouted riprap. No additional compensation will be made for removal outside these limits than is required to complete the work.
7. The contractor shall not allow concrete or other demolition or construction materials or debris to fall or roll into the creek during demolition and construction operations. Any cost associated with preventive measures shall not be paid for separately but be considered as included in the unit price(s) for the associated work.
8. The Contractor shall maintain at all times a 10 foot minimum horizontal clearance from the overhead ComEd 12 kV lines. If this minimum clearance cannot be maintained, the Contractor shall request from ComEd a power outage. ComEd requires up to 16 weeks of lead time for any outage. Any necessary outage will be at the expense of the Contractor.

Note:
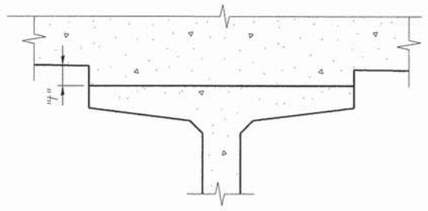
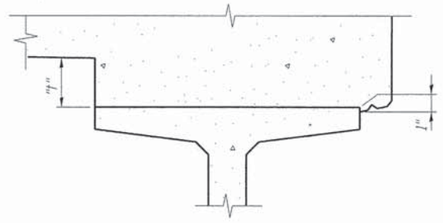
The above deflections are not to be used in the field if the engineer is working from the grade elevations adjusted for dead load deflections as shown below.



INTERIOR BEAM

To determine "t": After all PPC beams have been erected, elevations of the top flanges of the beams shall be taken at intervals shown below. These elevations subtracted from the "Theoretical Grade Elevations Adjusted for Dead Load Deflection" shown below, minus slab thickness, equals the fillet height "t" above top flange of beams.



EXTERIOR BEAM

FILLET HEIGHTS

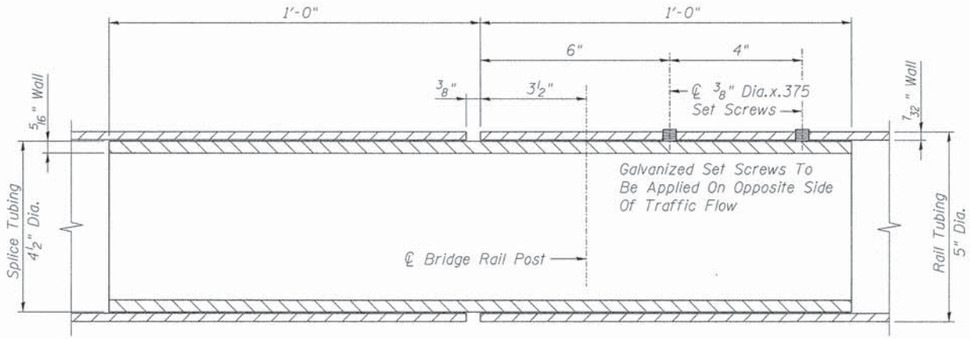
PARTIAL PLAN

PARTIAL ELEVATION



INSIDE SPLICE DETAIL

NOTES:

1. Railing to conform to vertical and horizontal alignment.
2. Joints to be placed 25'-0" center to center, max.
3. Slip joint to be placed in panels to match end of deck.
4. Design weight: 6 1/4 lbs. per foot.
5. Unless otherwise specified all draft to be 3°.
6. All unmarked Radii to be 1/8" R.
7. After fabrication all exposed surfaces of aluminum shall be given an anodic oxide coating, dyed black, conforming to the requirements of ASTM designation: B 580, Type B, Architectural Class I. See Special Provisions.
8. Three aluminum shims per post, one at 1/8" and two at 1/16" shall be provided for 25 percent of the posts.
9. At the Contractor option, either cast in place anchor devices or drilled and set anchor rods may be used to attach the posts to the concrete. Drilling and setting of anchor rods shall be according to Article 509.06. Cost of anchor devices and rods shall be included in the cost of Railing.

PLAN

VIEW B-B

Notes:

All cast iron parts shall be gray iron conforming to the requirements of AASHTO M 105, Class 35B.

Bolts, anchor studs, washers and nuts shall conform to the requirements of ASTM A 307 and shall be galvanized according to AASHTO M 232.

As an alternate, bolts, anchor studs, washers and nuts may be stainless steel according to Article 1006.29(d) of the Standard Specifications.

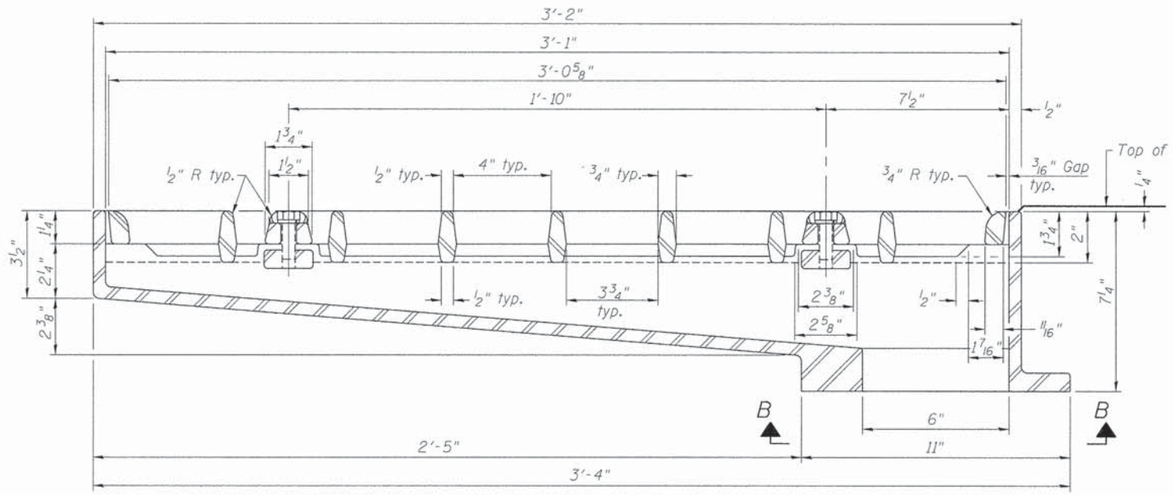
The exterior surfaces of the floor drains shall be coated or pigmented by the manufacturer with a color that matches the concrete.

Structural steel weldments of equal sections and of the same configuration may be substituted for the cast iron scupper frame. Fillet or full penetration welds shall be used for the weldments. Details shall be submitted to the Engineer for approval. Structural steel weldments shall not be substituted for the cast iron scupper grate. Structural steel frames and downspouts shall be galvanized according to AASHTO M111.

The Contractor shall take appropriate measures to assure that Protective Coat is not applied to the scupper.

Cost of the Grate, Frame, Downspout, Anchor Studs, Bolts, Washers and Nuts including complete installation of the scupper shall be paid for at the contract unit price each for Drainage Scupper, DS-33.

Alternate fiberglass downspout conforming to ASTM D 2996 with a short-time rupture strength hoop tensile stress of 30,000 psi min. may be used in lieu of the cast iron or steel equivalent.



SECTION A-A

See sheet of for scupper location relative to parapet.

PLUM VALLEY BRIDGE

GENERAL NOTES AND SPECIFICATIONS

1. Drawings and Specifications

These drawings and the specifications and notes hereon are an instrument of service only. They shall be used for no other purpose than the construction of the structure named hereon without the written consent of the Structural Engineer, George P. Wright, Jr.

The Structural Engineer shall make any and all revisions, additions and deletions to these working drawings and specifications. Revisions, additions and deletions to the Structural Engineer's working drawings and specifications by others shall void the Structural Engineer's responsibility for any part of the working drawings and specifications affected directly or indirectly by the changes.

2. Dimensions and Quantities

All dimensions shown on these working drawings, with the exception of footing depth, are believed to be correct; however, no guarantee of dimensional accuracy is made or implied. The Contractor shall be solely responsible for confirming all measurements affecting his work. The dimensions and quantities shown hereon are for guidance only. The work to be completed shall be paid for on a lump sum basis, and the contract price shall include all items of material, labor and equipment usage required to complete the work called for in the contract in a finished and workmanlike manner acceptable to the Structural Engineer and the Owner. Any differences between "As Built" dimensions and quantities and those shown on these working drawings, except for piling depth, shall be assumed to have been verified by the Contractor before making his lump sum bid proposal for the complete work. Piling shall be furnished and driven at the unit prices per foot stated in the contract. If it is required by site conditions that the footings be redesigned to accommodate lower allowable soil pressure than those used in the original design, quantities of excess concrete, reinforcing steel, excavation and sheeting shall be paid for at the unit prices stated in the contract for extra work.

3. Referenced Specifications

The design of the work and the construction thereof are intended to be in conformance with the following referenced specifications:

a. Standard Specifications for Road and Bridge Construction, adopted 7-1-76 Illinois Department of Transportation. (abbreviated IDOT hereinafter)

b. Standard Specifications for Highway Bridges, adopted by the American Association of State Highway and Transportation Officials Eleventh Edition 1973. (abbreviated AASHTO hereinafter)

c. Building Code Requirements for Reinforced Concrete ACI 318-71, American Concrete Institute. (abbreviated ACI hereinafter)

d. American Society for Testing Materials, individual sections as applicable. (abbreviated ASTM hereinafter)

The above specifications are hereby made a part of the specifications for the work shown on these drawings. Specific references are given in the text of Notes and Specifications for Excavation, Backfill, Concrete, Reinforcing Steel, etc, on following drawings, and as follows on this drawing.

The designation Engineer in IDOT shall mean the Structural Engineer for this project.

4. Contractor's Responsibilities

The responsibilities of the Contractor shall include but not be limited to the items which follow: The Owner, Owner's employees, the Civil Engineer or the Structural Engineer shall not be responsible in these matters whatsoever.

a. The Contractor shall have sole responsibility to comply with and enforce all applicable local, county, state and federal laws and requirements for the safety of his employees, suppliers, subcontractors, the public. Such responsibility shall include enforcement of all applicable provisions of the Occupational Safety and Health Act (OSHA), and regulations adopted pursuant thereto.

b. The Contractor shall be responsible for all construction means, methods, techniques, sequences and procedures; and for safety precautions and programs, including the safety and adequacy of shoring, forms, sheeting, safety railing, and scaffolding to be used on this project which shall be designed to adequately support any and all dead loads and construction loads which may come upon them.

c. The Contractor shall indemnify and hold harmless the Owner, the Civil Engineer, and the Structural Engineer and their directors, officers, agents, servants and employees from any and all losses, expenses, damages (including loss of use), demands and claims, arising out of or occasioned by matters covered by this Contract and the work hereunder, and to defend any suit or action brought against them, or any of them, based upon any such injury or alleged injury (including death) or damage (including loss of use), and to pay all damages, judgments, costs and expenses, including attorney's fees, in connection with said damages, injuries, claims, demands or suits, or resulting therefrom.

d. In furtherance of the indemnity set forth in subparagraph c, above, but not in limitation thereof, the Contractor shall take out and maintain, at its own cost and expense, and before commencing any of its operations hereunder, the following kinds and minimum limits of insurance coverage:

1. Workmen's Compensation, Occupation Disease	Statutory or unlimited Amounts
2. Employer's Liability	$100,000
3. Comprehensive General (Including blanket Assumed Contractural Liability) Liability Insurance	
(a) Bodily Injury	$500,000 per person
	$1,000,000 each occurrence
(b) Property Damage	$ 50,000 each occurrence
	$100,000 aggregate premises and contractural
4. Comprehensive Automobile Liability (Including owned, non-owned, hired vehicles)	
(a) Bodily Injury	$100,000 each person
	$300,000 each occurence
(b) Property Damage	$ 50,000 each occurrence

All such policies shall be written and issued by companies satisfactory to the Engineer. Compliance with the required insurance coverage shall be evidenced by certificates of such insurance to be forwarded to the Engineer at its business address. Such certificates shall contain a stipulation to the effect that the insurance, covered by the certificate will not be cancelled by lapse of time or otherwise except upon not less than ten (10) days prior written notice to that effect, by United States Registered or Certified Mail to the Engineer at its business address.

NOTES AND SPECIFICATIONS FOR CLEARING, EXCAVATION, BACKFILLING AND EMBANKMENT

The work specified herein shall be that done between a north-south line 40 feet west of the face of the west abutment and a north-south line 40 feet east of the face of the east abutment. Embankment east and west of the area above defined shall be furnished by the Owner.

1. Cleaning

Any clearing required as designated by the Structural Engineer shall conform to the applicable provisions of IDOT as follows: Sections 201.01 thru 201.04 and 201.06 thru 201.08.

2. Excavation

Excavation shall be that required to provide for the new footings with the slopes above the level of the top of footing being maintained in a stable condition until all project work prior to permitted backfilling has been completed.

The work shall conform to the applicable provisions of IDOT as follows: Sections 502.01, 502.02, 502.03, 502.05, 502.08 thru 502.10. The following provisions shall supersede IDOT where there is a conflict:

Excavation for footings shall be accomplished so as to allow footing concrete to be placed against: (a) undisturbed earth, or (b) sheeting drive into undisturbed earth along the footing outline with subsequent excavation within the sheeting to plan depth. If the latter method is used, the sheeting shall be left in place.

The use of sheeting shall be at the option of the Contractor, and no compensation for sheeting material or labor to place same shall be paid him, whether he uses sheeting for the footings as shown on the plans or for any revised footing design needed because of soil bearing capacity.

3. Backfilling and Approach Embankment

Backfilling and approach embankment within the area defined above shall be completed by the Contractor in conformance with IDOT Sections 502.11 and 502.14.

NOTES AND SPECIFICATIONS FOR CAST IN PLACE CONCRETE STRUCTURES

The work specified herein shall conform to the applicable provisions of IDOT as follows: Sections 503.01 thru 503.06, 503.07(b), 503.09 (as modified by notes on drawings), 503.13, and 503.15. The cost of any and all appurtenances called for on the drawings shall be included in the lump sum price stated in the contract.

All references in IDOT to the "Engineer" shall mean the Structural Engineer, George P. Wright, Jr., except that any proportioning of concrete mixtures shall be determined by the Contractor or his Concrete Supplier so as to furnish concrete in the completed structure in accordance with all applicable provisions of IDOT Section 504.

The Structural Engineer shall engage a Testing Laboratory to make all tests as required by Section 504 of IDOT. The Contractor shall reimburse the Structural Engineer for the cost of all testing expense including transportation as billed to the Structural Engineer by the Testing Laboratory plus a servicecharge of 20% to compensate the Structural Engineer for his handling and review of the testing reports. A schedule of Testing Laboratory fees shall be available to bidders at the Structural Engineer's Office prior to bidding.

The Structural Engineer shall not furnish to prospective bidders any approximate proportions for concrete as is called for in IDOT Section 504.08 (the last paragraph beginning on page 288). The responsibility for such approximate proportions shall rest solely with the prospective bidder or his concrete supplier.

1. Concrete

All concrete shall be Class X as called for in IDOT, except that Handrail Concrete shall have a maximum size of coarse aggregate passing a 1" sieve. All concrete shall conform to the requirements of applicable provisions of IDOT as follows: Sections 504.01 thru 504.04, 504.07 thru 504.15 except that all proportioning of mixes shall be the responsibility of the Contractor or his Concrete Supplier. The Contractor shall furnish his proposed portions for concrete mixes to the Structural Engineer at least 7 calendar days before ordering any concrete delivered to the job site. The furnishing of such proposed proportions to the Structural Engineer shall be for information purposes to assure that proper controls of the mixes are being proposed. The Structural Engineer's review shall in no way relieve the Contractor's responsibility to provide concrete in the completed structure meeting the requirements of IDOT Section 504.

A minimum of three test specimens taken from each days pour shall be required. The specimens shall be taken by the Contractor at the direction of the Testing Laboratory and shall be transported to the Testing Laboratory by Testing Laboratory personnel.

Superstructure concrete shall not be placed until the last concrete placed in the substructure has cured and attained a modulus of rupture of 650 psi. A minimum of 24 hours notice shall be given to the Structural Engineer, so that he may inspect the footing excavation with bars in place and inspect the wall and superstructure forms with bars in place at least 2 hours before any scheduled placement of concrete.

2. Falsework and Forms

All falsework and forms shall conform to the applicable provisions of IDOT as follows: Sections 504.05 and 504.06. All provisions and understandings of Sections 504.05 and 504.06 shall apply and be conformed to by the Contractor. The Contractor shall submit detailed plans for falsework and form work for examination by the Structural Engineer. If such plans are not satisfactory to the Structural Engineer, the Contractor shall make such changes in them as may be required, but it is understood that the Structural Engineer's concurrence in the use of the plans as submitted or corrected shall in no way relieve the Contractor of full responsibility for obtaining satisfactory results and for safety and adequacy of load carrying capacity.

3. Curing of Concrete

All concrete placed on this project shall be cured and protected in conformance with the applicable provisions of IDOT as follows: Section 625.01, 625.02, 625.03, 625.04(c) and (d), 625.06, 625.07, and 625.08.

4. Reinforcing Steel for Concrete

The furnishing and placement of all reinforcing steel for this project shall conform to the applicable provisions of IDOT as follows: Section 512.01 thru 512.06 and 710.13 (a) and (b). The bars shall conform to ASTM A615 Grade 40 deformed bars.

5. Preformed Expansion Joint Filler

The preformed joint filler shall conform to the provisions of IDOT Sections 715.01 and 715.04.

6. Scuppers and Weep Holes

The pipe used for the deck scuppers and the abutment and wing wall weepers shall be of a good quality commercially available galvanized tubing.

NOTES AND SPECIFICATIONS FOR STRUCTURAL STEEL, STEEL PILING, AND STEEL RAILING

The work specified herein shall conform to the applicable provisions of IDOT as follows: Sections 507.01; 507.02 as herein modified: 507.03 thru 507.05; 507.07; 507.08; 507.11 thru 507.13; 508.01 thru 508.03; 513.01; 513.02 (b); 513.05 (a) thru (c); 513.07 (a) and (d); 513.08 thru 513.11; 513.13 thru 513.15; 513.17; 513.18; 513.19 (b), (c), (f), and (i).

Sections 507.02 (a) and 513.02 (b) shall be modified as follows: Structural Steel and Steel Piles shall conform to ASTM-A588 - "weathering type" - high - strength low - alloy structural steel. (AASHTO M222)

Steel Railings including posts, fastening material, and fasteners shall be galvanized as per AASHTO-M111 and ASTM-A385.

Structural Steel and Steel Piles shall not be painted.

Steel Railings, if that alternate is included in the contract, shall conform to Base Sheet R-24 in the IDOT Bridge Manual except as modified on these project drawings.

Payment for all Structural Steel and Steel Railings including all fastening material and fasteners shall be included in the lump sum contract price for the project.

Payment for all Steel Piles and Pile Driving shall be as follows:

1. Test Piles

Lump sum for furnishing and driving one Test Pile at the East Abutment in the permanent location of an abutment pile. The test pile shall be 70 feet in length and shall be driven 10 feet deeper after the bearing capacity called for on the substructure drawing is attained, or to refusal, whichever occurs first.

2. Furnishing Steel Piles

Price per foot for furnishing the remaining 15 piles from a list prepared by the Structural Engineer based on the results of the test pile.

3. Driving Steel Piles

Price per foot for driving the remaining 15 piles to specified bearing capacity or to refusal except that minimum penetration shall be 20 feet in natural ground unless refusal shall occur first.

NOTES AND SPECIFICATIONS FOR PRECAST TRANSVERSE DECK SLABS

All Precast Deck Slabs shall conform to the applicable provisions of IDOT as follows: Sections 505.01 thru 505.05. They shall also conform to the design shown on these project drawings.

Payment for furnishing and erecting Precast Deck Slabs including all fastening material, fasteners, curb stirrups and bolting inserts shall be included in the lump sumcontract price for the bridge.

NOTES AND SPECIFICATIONS FOR BITUMINOUS PAVEMENT

It is intended that the Bituminous Wearing Surface shown on these project drawings will be furnished and applied to the bridge by the contractor constructing and paving the road abutting the bridge site.

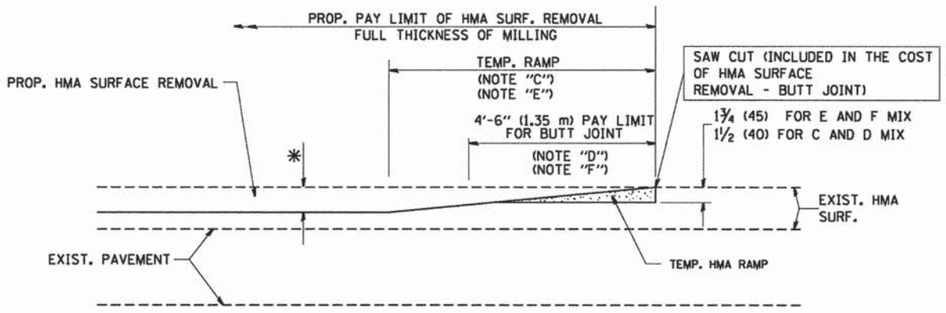
MILLED TEMPORARY RAMP

(FOR BUTT JOINT AND HMA TAPER SEE DETAIL BELOW)

OPTION 1

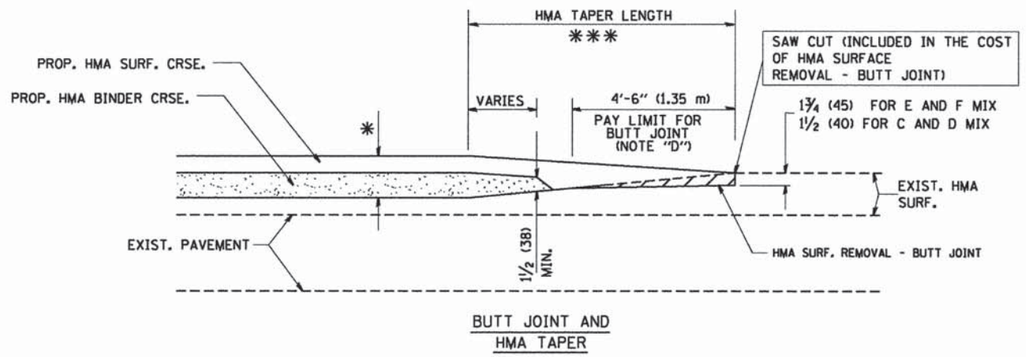


HMA CONSTRUCTED TEMPORARY RAMP

(FOR BUTT JOINT AND HMA TAPER SEE DETAIL BELOW)

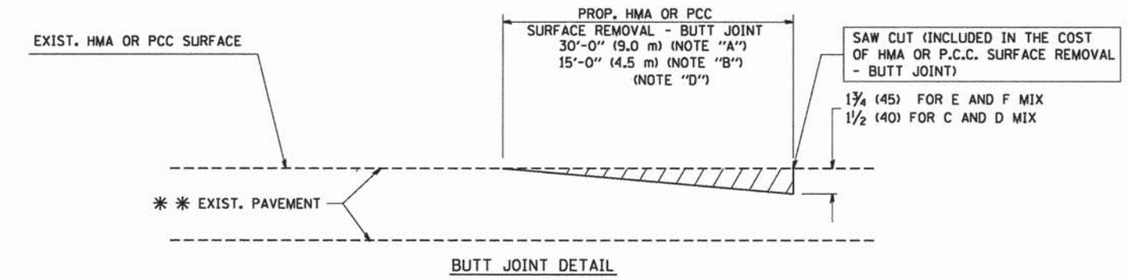
OPTION 2

TYPICAL TEMPORARY RAMP

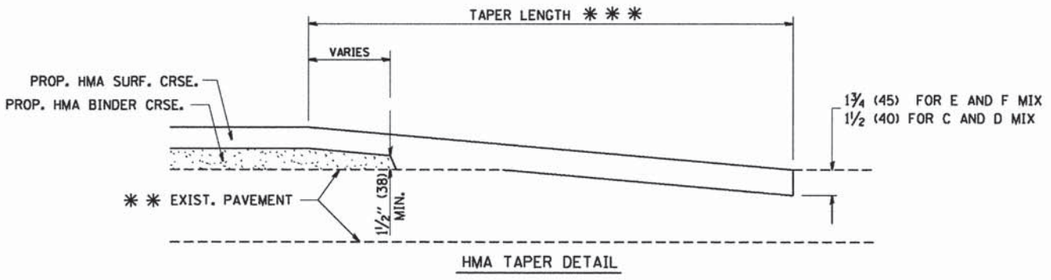


BUTT JOINT AND HMA TAPER

TYPICAL BUTT JOINT AND HMA TAPER FOR MILLING AND RESURFACING



BUTT JOINT DETAIL



HMA TAPER DETAIL

TYPICAL BUTT JOINT AND HMA TAPER FOR RESURFACING ONLY

** PC CONCRETE, HMA OR HMA RESURFACED PAVEMENT.

NOTES

A: MAINLINE ROADWAYS AND MAJOR SIDE ROADS.

B: MINOR SIDE ROADS.

C: THE TEMP. RAMP SHALL BE CONSTRUCTED IMMEDIATELY UPON REMOVAL OF THE EXISTING HMA SURFACE.

D: THE BUTT JOINT SHALL BE CONSTRUCTED IMMEDIATELY PRIOR TO PLACING THE PROPOSED HMA COURSES.

E: TAPER THE TEMP. RAMP AT A RATE OF 3'-0" (900 mm) PER 1 INCH (25 mm) OF MILLING THICKNESS.

F: INSTALLATION AND REMOVAL OF THE 4'-6" (1.35 m) TEMP. RAMP IS INCLUDED IN COST OF HMA SURFACE REMOVAL - BUTT JOINT

G: SEE ARTICLE 406.08 AND 406.14 OF THE STANDARD SPECIFICATIONS FOR "HMA AND/OR PCC SURFACE REMOVAL, BUTT JOINT".

* SEE TYPICAL SECTIONS FOR MILLING THICKNESS.

*** 20'-0" (6.1 m) PER 1 (25) RESURFACING (NOTE "A")
10'-0" (3.0 m) PER 1 (25) RESURFACING (NOTE "B")

BASIS OF PAYMENT:

THE BUTT JOINT WILL BE PAID FOR AT THE CONTRACT UNIT PRICE PER SQUARE YARD (SQUARE METER) FOR "HOT-MIX ASPHALT SURFACE REMOVAL - BUTT JOINT" OR FOR "PORTLAND CEMENT CONCRETE SURFACE REMOVAL- BUTT JOINT".

ALL DIMENSIONS ARE IN INCHES (MILLIMETERS) UNLESS OTHERWISE SHOWN.

TYPICAL BENCHING DETAIL FOR EMBANKMENT

NOTES:

1. CONSTRUCT SUCCEEDING BENCH CUTS AND EMBANKMENT PLACEMENT AND COMPACTION FROM BOTTOM TO TOP IN STAIRSTEP FASHION.
2. EXISTING FORESLOPE PREPARED IN ACCORDANCE WITH ARTICLE 205.03 OF THE STANDARD SPECIFICATIONS.
3. BENCH CUT EXISTING SLOPE TYPICAL FOR EACH STEP.
4. TRIM TO FINAL SLOPE.
5. EQUAL 8-INCH (200) LIFTS OF EMBANKMENT COMPACTED IN ACCORDANCE WITH ARTICLE 205.05 OF THE STANDARD SPECIFICATIONS.
6. EXCAVATION OF BENCH CUTS WITHIN EXISTING EMBANKMENT WILL BE PAID FOR AT THE CONTRACT UNIT PRICE PER CUBIC METER OR CUBIC YARD FOR "EARTH EXCAVATION". THIS PRICE WILL INCLUDE ALL LABOR AND MATERIAL, NO ADDITIONAL COMPENSATION WILL BE ALLOWED.
7. SLOPES SHALL BE BENCHED ACCORDING TO THIS DETAIL WHEN THE SLOPE IS STEEPER THAN 4:1 AND THE HEIGHT IS GREATER THAN 5' (1.5 m).

ALL DIMENSIONS ARE IN INCHES (MILLIMETERS) UNLESS OTHERWISE SHOWN.
