 ① Provises stringer bearlings as scheduled, see Sht. 5 & 6 of 15. ② Penanve & replaces deck and paragel joint seets, see Sht. 7, 8, 8 9 of 15. ③ Pepair concrete substructure elements as scheduled, see Sht. 7, 8, 8 9 of 15. ③ Pepair concrete substructure elements as scheduled, see Sht. 7, 8, 8 9 of 15. ③ Pepair concrete substructure elements as scheduled, see Sht. 7, 8, 8 9 of 15. ③ Pepair concrete substructure elements as scheduled, see Sht. 7, 8, 8 12 of 15, and Note 4 this sheet. ④ Clean & point existing state as scheduled, see Sht. 7, 8, 8 12 of 15, and Note 4 this sheet. ③ Peasare over -rolated north bearing of Jowa approach spon at Per 1. See Sht. 4 of 15. ⑤ Peasare & replace existing state of deck as scheduled, and repair braken dock welds as scheduled, see Sht. D of 15. ⑥ Clean & point existing beartings and grease bearing pins, byp. Pier 1 thru Pier 5, included in "Cleaning & Pointing". ③ Add supplemental onchor boil for steet russ, north bearing at Pier 5, see Sht. 4 of 15. ③ Clean bearing stats and apply concrete sealer as scheduled, see Sht. 12 of 15, (excludes PB4 and B3 which reacher fiber wrap). 	ಕಾರ್ಯ				1.) E	xisting Structure No. 008-6000 was origin	
 A peolic concrete substructure elements as scheduled, see Sht, 12, 13, 8, 14 of 15. Clean & point existing steel as scheduled, see Sht, 7, 8, 8, 12 of 15, and Note 4 this sheet. Reset over-colded north bearing of Tawa approach span at Fier 1. See Sht, 4 of 15. Reave & replace existing steel grid deck as scheduled, and repair broken deck welds as scheduled, see Sht. 10 of 15. Reave & scheduled, see Sht, 00 of 15. Clean & point existing bearings and grease bearing plas, typ. Fier 1 thru Pier 5, included in "Cleaning & Painting". A dd supplemental another boil for steel truss, north bearing of Fier 5, see Sht. 4 of 15. Reave existing stime retaining wall, place stope fill and stone riprap, see Sht. 15 of 15. Reave existing wall, place stope fill and stone riprap, see Sht. 12 of 15. (excludes PB4 and B3 which reselve filter 		() Replace stringer bearings as scheduled, se	s as scheduled, see Sht. 5 & 6 of 15.			towa Department of Transportation as Project NG the Illinois Department of Transportation Section	
 (a) Cleam & paint existing steel as scheduled, see Sht, 7, 8, 8, 12 of 15, and Note 4 this sheet. (b) Reset over-rotated north bearing of laws approach span at Pier I. See Sht. 4 of 15. (c) Ream & paint existing steel grid deck as scheduled, and repair broken deck		(2) Remove & replace deck and parapet joint seals, see Sht. 7, 8, & 9 of 15.			2.) 7	he bridge carries two lanes of traffic on	
 (3) Resel over-rotated north bearing of Jawa approach span at Pier 1. See Sht. 4 of 15. (4) Remove & replace existing steel grid deck as scheduled, and repair broken deck welds as scheduled, see Sht. 10 of 15. (7) Clean & paint existing bearings and grease bearing pins, typ. Pier 1 thru Pier 5, heluded in "Cleaning & Painting". (8) Add supplemental anchor bolt for steel truss, north bearing at Pier 5, see Sht. 4 of 15. (9) Remove existing timber retaining wall, place slope fill and stone riprap, see Sht. 15 of 15. (9) Clean bearing seats and apply concrete sealer as scheduled, see Sht. 12 of 15. (excludes PB4 and B3 which receive fiber wrap.) 							
 (6) Remove & replace existing steel grid deck as scheduled, and repair broken deck welds as scheduled, see Sht. 10 of 15. (7) Clean & paint existing bearings and grease bearing pins, typ. Pier 1 thru Pier 5, included in "Cleaning & Painting". (8) Add supplemental anchor boil for steel truss, north bearing at Pier 5, see Sht. 4 of 15. (9) Remove existing timber retaining wall, place slope fill and stone riprap, see Sht. 15 of 15. (9) Clean bearing seats and apply concrete sedier as scheduled, see Sht. 12 of 15. (excludes PB4 and B3 which receive fiber wrap.) 							
 weids as scheduled, see Sht. ID of 15. ^{**} ^{**} ⁽⁷⁾ Clean & paint existing bearings and grease bearing pins, lyp. Pler I thru Pler 5, included in "Cleaning & Painting". (8) Add supplemental anchor balt for steel truss, north bearing at Pier 5, see Sht. 4 of 15. (9) Remove existing timber retaining wall, place slope fill and stone riprap, see Sht. 15 of 15. (10) Clean bearing seats and apply concrete sealer as scheduled, see Sht. 12 of 15. (excludes PB4 and B3 which receive fiber wrap.) 							
 Add supplemental anchor bolt for steel truss, north bearing at Pier 5, see Sht. 4 of 15. Remove existing timber retaining wall, place slope fill and stone riprap, see Sht. 15 of 15. Clean bearing seats and apply concrete sealer as scheduled, see Sht. 12 of 15. (excludes PB4 and B3 which receive fiber wrap.) 							
 Remove existing timber retaining wall, place slope fill and stone riprap, see Sht. 15 of 15. Clean bearing seats and apply concrete sealer as scheduled, see Sht. 12 of 15. (excludes PB4 and B3 which receive fiber wrap.) 	3/10/X
