## GENERAL NOTES (CONTINUED)

Following are the known utilities located within the project limits or immediately adjacent to the project construction limits which are not members of JULIE and should be notified individually by the contractor:

Government IDOT - District 2 819 Depot Ave. Dixon, IL 61021 (815) 284-5469

The applicable portions of Article 105,07 of the Standard Specification shall apply except for the following: The Contractor shall be responsible to locate the vertical depths of the underground utilities which may interfere with construction operations. This work will not be measured or paid for separately, but shall be considered as included in the unit bid price for the item of construction involved. Per SB 699 (90 day utility relocation law), once right-of-way is clear to award the project, a notice will be sent to the utility companies instructing them to have their facilities relocated within 90 days.

CADD data will be available to Contractors and Consultants working on this project. This information will be provided upon request as MicroStation CADD files and Geopak coordinate geometry files ONLY. If data is required in other formats it will be your responsibility to make these conversions. If any discrepancy or inconsistency arises between the electronic data and the information on the hard copy, the information on the hard copy should be used. Contact the District's Project Engineer to request these files.

Estimated date relocation complete = Letting Date + 135 days.

An existing septic field is located within the temporary easement on the Gabriel P Gomez and Seamon properties. It is not anticipated that the proposed improvements will affect the septic field. The contractor shall field locate the septic field prior to construction. The engineer shall be notified if construction operations indicate that the existing septic field will be disturbed.

## UTILITIES - LOCATIONS/INFORMATION ON PLANS

The locations of existing water mains, gas mains, sewers, electric power lines, telephone lines and other utilities as shown on the plans are based on careful field investigation and the best information available, but they are not guaranteed. Unless elevations are shown --- all utility locations shown are based on the approximate depth supplied by the utility company. It shall be the Contractor's responsibility to ascertain their exact location from the utility companies and by field inspection.

## TREE REMOVAL - UTILITY RELOCATION

Tree removal may be necessary prior to utility companies being able to relocate their facilities outside the construction limits. The Contractor should coordinate any contract tree removal activities with the utility companies to eliminate conflicts and potential delays caused by utility tree removal activities or incomplete utility relocations.

#### PROPERTY OWNER ACCESS REQUIREMENT

Access must be maintained to all existing properties during construction per Article 107.09 unless arrangements are made in writing by the Contractor with the property owners with a copy to the Engineer for short-term closures.

### CLEARING

At locations where clearing is indicated on the plans beyond the limits of the proposed excavation or embankment, the Contractor shall restore the disturbed earth by blading and shaping to blend with the adjacent ground. The clearing will not be paid for separately but shall be included in the cost of Earth Excavation. Payment for reseeding or resodding shall be as provided in the plans.

#### ORDERING LENGTH CONFIRMATION - DRAINAGE ITEMS

The Contractor shall consult with the Engineer in regard to the exact length of the box/pipe culverts, storm sewers, and/or pipe drains required prior to ordering these items.

The applicable portions of Article 105.07 of the Standard Specification shall apply except for the following: The Contractor shall be responsible to locate the vertical depths of the underground utilities which may interfere with construction operations. This work will not be measured or paid for separately, but shall be considered as included in the unit bid price for the item of construction involved.

Per SB 699 (90 day utility relocation law), once right-of-way is clear to award the project, a notice will be sent to the utility companies instructing them to have their facilities relocated within 90 days. Estimated date relocation complete = Letting Date + 135 days.

The contractor shall contact the District Enviromental Unit at 815/284-5460 immediately after award of the contract to obtain information related to hazardous waste materials within the project limits.

An existing septic field is located within the temporary easement on the Seaman property. It is not anticipated that the proposed improvements will affect the septic field. The contractor shall field locate the septic field prior to construction. The engineer shall be notified if construction operations indicate that the existing septic field will be disturbed.

Remove existing retaining walls at Sta. 1124+71.30 to 1124+74.92, and Sta. 1129+95.73 to 1130+24.29. Cost of this work shall be included in the contract unit price per cubic yard for Earth Excavation.

Existing driveway drainage trench at Sta. 1127+00, Rt. to be replaced in proposed Portland Cement Concrete Driveway Pavement, 7 Inch. This work shall be included in the contract unit price per square yard for Portland Cement Concrete Driveway Pavement, 7 Inch.

The removal of temporary storm sewer pipes shall not be paid for separately but shall be included in the contract unit price per Foot for PIPE CULVERTS, CLASS D of the type and size specified.

Maintenance of Flow Flow must be maintained throughout the project. Normal flow shall be allowed to pass at the rate it enters the job site. High flows shall be allowed to pass without causing damage to upstream properties.

# COMMITMENTS

Only the trees shown for removal shall be removed. All other trees to be saved.

The contractor shall avoid the security lights and the logo sign during construction at the Dairy Queen Brazler from Sta. 1130+50 Rt. to Sta. 1132+50 Rt.

The following facilities shall be protected and maintained at all times. Construction to be performed by hand as noted in the plans to avoid impacting the existing facilities.

Parcel 013/13 Todd H. Puckett

1 sign (Dollar General) 1124+00.00 RT

1 light pole 1125+00.00

Parcel 003TE Gunlach

1 light pole 1116+13.00 RT

Parcel 007/7 Weaver

1 sign with landscaping 1120+00.00 LT

Mr. Barton Smith Mrs. Ellen Smith 200 North Sawyer Road Morrison, IL 61270

A commitment that the contractor will install bituminous blacktop as shown on the plans and saw cut an entrance on the north end of the employee parking area for construction of Route 30 in Morrison. The blacktop and entrance will remain in place when the project is completed.

State and contractor vehicles will not be allowed to park on the west side of the Dairy Queen during the construction project.

The drive-up window will be accessible during all phases of the project.

Mr. Jamison Schroeder Mrs. Angela Schroeder 300 Sycamore Street Morrison, IL 61270

A commitment to you that the tree contractor will install trees between the right of way line and new retaining wall along route 30 in front of your house if at all possible.

Mrs. Dorothy Vos 303 Scenic Drive Morrison, IL 61270

A commitment to you that your driveway at station 1138+50RT will be reinstalled at 35 feet and extend to the east as far as possible during construction on route 30 in Morrison.

Mr. Garry Seaman Mrs, Judy Seaman 15880 Lincoln Road Morrison, Il. 61270

A commitment to you that your driveway in the easement area will be replaced with bituminous blacktop at no cost to you.

The tree contractor will install trees in the right of way in front of your house if at all possible.

The septic field will be worked around.
