Prior to ordering any material, the Contractor shall verify in the field all bearing height and shim thickness dimensions. The minimum jack capacity required is 65 Tons. New steel extensions, side retainers, connection bolts, anchor bolts, and shim plates are included in "Furnishing and Erecting Structural Steel". Hatched areas indicate Jack and Remove Existing Bearings.

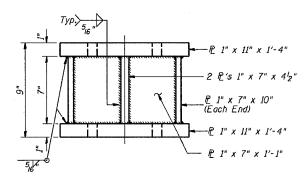

Existing diaphragm removal may be required to provide clearance for the drill during drilling holes in the bottom flange for new bearing attachment. Cost shall be included in the cost of "Furnishing and Erecting Structural Steel".
