PROPERTY OWNER ACCESS REQUIREMENT

Access must be maintained to all existing properties during construction per article 107.09 unless arrangements are made in writing by the contractor with the property owners with a copy to the engineer for short-term closures.

GENERAL NOTES

- 1.) The thickness of bituminous mixtures shown on the plans is the nominal thickness. Deviations from the nominal thickness will be permitted when such deviations occur due to irregularities in the existing surface or base on which the bituminous mixture is placed.
- 2.) Except as noted in the plans, pavement grades shown are at the top of pavement surfaces.
- 3.) Where section or subsection monuments are encountered, the engineer shall be notified before such monuments are removed. The contractor shall protect and carefully preserve all property markers and monuments until the owner or an authorized surveyor or agent has witnessed or otherwise referenced their their substitution. location. The contractor will be responsible for having an authorized surveyor re-establish any section or subsection monuments destroyed by his operations.
- 4.) Seeding will not be permitted at any time when the ground is frozen, wet or in an untillable condition. Areas to be seeded shall be determined by the engineer and seeded as soon as possible.
- 5.) All saw cuts, not including patches, necessary to complete the work detailed in these plans, shall be included in the cost for the various pay items involved. The minimum saw cut depth in the pavement shall be 1½" unless otherwise specified in a detail shown in the plans.
- 6.) Unless directed by the engineer, pavement marking lines shall not be laid directly over a longitudinal crack or joint nor over a tar or asphalt painted line. The edge of a centerline or lane line shall be offset a minimum distance of 2" from a longitudinal crack or joint. Edge lines shall be approximately 2" from the edge line of pavement. See section 780 of the standard specifications for traffic control items.
- 7.) Abandoned underground utilities that conflict with construction shall be disposed outside the limits of right of way according to article 202.03 of the standard specifications and as directed by the Engineer. This work will not be paid for seperately but shall be included in the cost per cubic yard for furnished excavation and no additional compensation will be allowed.
- 8.) Any reference to a standard in these plans shall be interpreted to mean the edition as indicated by the subnumber listed in the index of sheets or the copy of the standard included in these plans.
- 9.) In addition to the field surveys, plan dimensions and details relative to the existing facilities have been taken from existing plans and are subject to construction variations. It shall be the contractor's responsibility to verify such dimensions and details in the field. Such variations shall not be a cause for additional compensation due to change in the scope of work. However, the contractor will be paid for the quantity actually furnished at the unit price bid for the work.
- 10.) The existing road signs that interfere with construction will be removed or relocated as directed by the Engineer. After the construction is completed, the contractor will replace the signs as directed by the Engineer. This work will not be paid separately but shall be considered included in the contract, and no compensation will be allowed.
- (1.) The location of all utilities are based on information provided by others and is intended to be approximate. It shall be the contractor's responsibility to coordinate his construction activities with the various utility owners. All potential conflicts shall be investigated and remedial action taken prior to interruption of the contractor's progress.
- 12.) The contractor shall be responsible for protecting utility property from construction operations as outlined in article 107.31 of the standard specifications. The J.U.L.I.E. Number is 800-892-0123. A minimum of forty-eight hours advance notice is required.
- 13.) All elevations shown on the plans are based on U.S.G.S. Mean sea level datum. All station and offset references are to the roadway centerline unless otherwise noted.
- 14.) Any excavation necessary to place Hot Mix Asphalt Binder Course and Base Course Widening 8" will not be paid for separately but shall be included in the cost of the HMA items involved.

Commitments: None

The following rates of application have been used to calculate the plan quantities:

Bituminous materials (prime coat) Bituminous materials (prime coat) Bituminous materials (prime coat) Hot mix asphalt surface / binder Aggregate material Riprap Nitrogen fertilizer nutrient Phosphorous fertilizer nutrient Potassium fertilizer nutrient Aggregate prime coat	2.05 ton/cu. yd. 1.35 ton/cu. yd. 90 lbs./acre 90 lbs./acre 90 lbs./acre 0.002 ton/sq. yd.
Agricultural ground limestone	2.0 ton/acre
