The IDOT District One Geotechnical Unit has reviewed the revised Roadway Geotechnical Report (RGR) prepared by Geo Services, Inc., dated August 20, 2021 for the above-referenced project. The report was revised based on comments from IDOT, dated July 30, 2021, and provides geotechnical recommendations for the proposed roadway improvement project located at the intersection of Illinois Route 53 (IL 53) and Illinois Route 56 (IL 56) in Milton Township, DuPage County.

Based on the design plans, the improvements on IL 53 begin on the south side at Station 750+40 and end on the north side at Station 779+53 and the improvements to IL 56 begin on the west side at Station 159+60 and end on the south side at Station 233+40. The proposed improvements will include pavement resurfacing, reconstruction, curb and gutter, storm sewer, sidewalks, lighting, and traffic signals. The improvements will also include a bridge deck replacement for the bridge carrying IL 56 over the East Branch of the DuPage River and new noise walls.

After reviewing the revised RGR, we find that all of our previous comments have been addressed, and the report is approved.

If you have any questions regarding this review, please contact Robert Claussen, P.E. at (847)705-4735 or Giancarlo Gierbolini, P.E. at (847) 705-4003.
