

# LOCATION 1 STRUCTURE NO. 029-0025 IL 95 OVER THE SPOON RIVER INFORMATION ONLY

Estimated Structural Steel in Existing Bridge 572,940 Lbs.

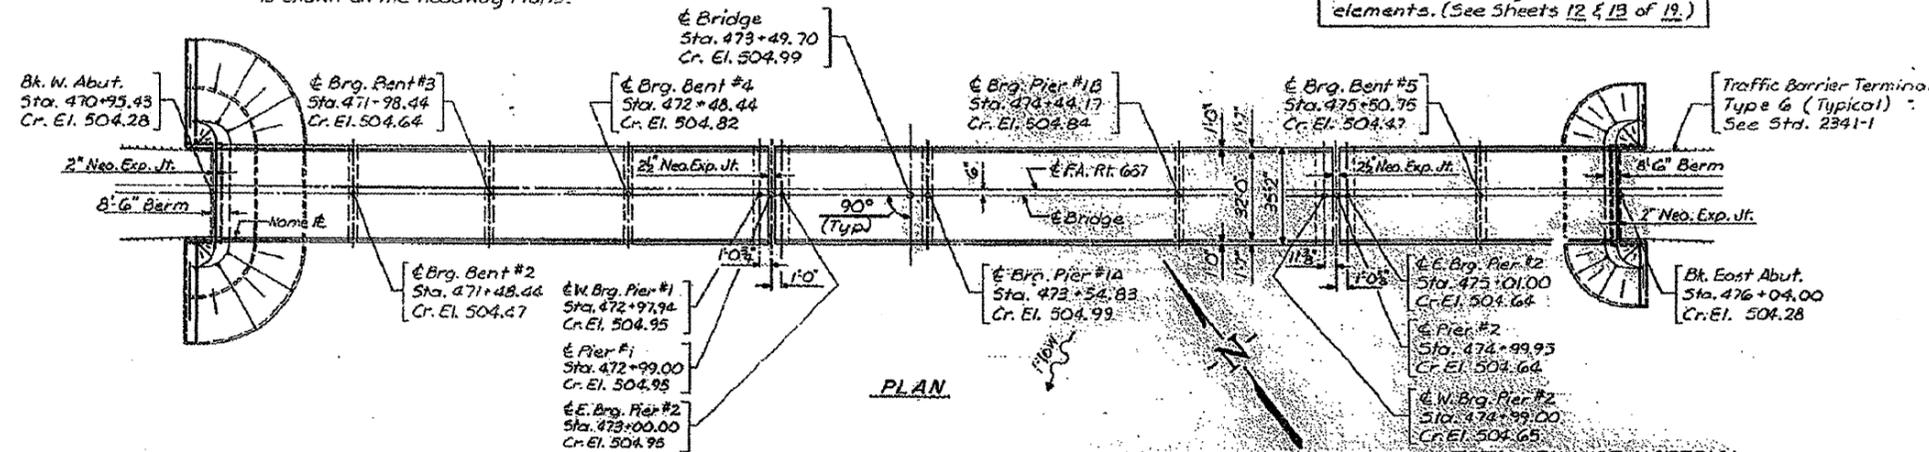

Note: The  $\bar{c}$  of Bridge that is shown on the Structure Plans, Sheets 1 thru 19, is the same as the  $\bar{c}$  of Construction that is shown on the Roadway Plans.

Note: The centerline of bearing for the new superstructure does not necessarily match the centerline of the existing substructure elements. (See Sheets 12 & 13 of 19.)

### GENERAL NOTES:

1. Reinforcement bars shall be AASHTO M-31 or M-58 Grade 60.
2. See Sheet 2 of 19 for Boring Data.
3. Fasteners shall be High Strength Bolts AASHTO M 164, Type III. Bolts  $\frac{3}{8}$ "<sup>Ø</sup>, open holes  $\frac{13}{16}$ "<sup>Ø</sup>, unless otherwise noted.
4. Calculated weight of Structural Steel = 383,990 Lbs. M222.
5. All structural steel shall be AASHTO M222.
6. The basic lead silico chromate paint system shall be used for shop & field painting of Structural Steel except where otherwise noted.
7. AASHTO M222 structural steel shall not be painted except, that for a distance of three times the depth of the beams or girders (but not exceeding 10 feet) each way from deck joints, the AASHTO M222 structural steel shall be cleaned and given one coat of the basic lead silico chromate primer & mororan field coat. Both coats to be applied in the shop with spot painting only in the field.
8. The structural steel bearing plates of the Elastomeric Bearing Assembly shall conform to the requirements of AASHTO M222.
9. Field welding of construction accessories will not be permitted to the bottom flange of beams nor to the top flange for a distance equal to one-fourth the span length each way from the pier supports. Field welding in other areas will be permitted only when approved by the Engineer.
10. Anchor bolts shall be set before bolting diaphragms over supports.
11. Layout of slope walls may be varied in the field to suit ground conditions as directed by the Engineer.
12. The contractor shall drive two HP10x42 test piles in permanent locations, one at Bent #2 and one at the East Abutment, as directed by the Engineer before ordering the remainder of piles.
13. Plan dimensions and details relative to the existing substructure have been taken from existing plans and are subject to nominal construction variations. It shall be the Contractor's responsibility to verify such dimensions and details in the field and make necessary approved adjustments prior to construction or ordering of materials. Such variations shall not be the cause for additional compensation for a change in the scope of the work, however, the Contractor will be paid for the quantity actually furnished at the unit price bid for the work.
