Item 229

IDOT PROJECT LABOR AGREEMENT DETERMINATION

To Ann L. Schneider, Secretary

From Omer Osman, Director

Date. March 31, 2014

Re FAU Route 5756 (3rd Avenue), Contract Number 64J68, Rock Island County
{3rd Avenue from 19th Street to 23rd Street in Moline, IL}

In accordance with the Project Labor Agreement Act (30 ILCS 571), it is recommended that a project labor agreement (PLA) be utilized for the above-captioned Project. This recommendation is based on the considerations indicated below.

- 1) The Project is being awarded and administered by IDOT (i.e., not by another governmental agency).
- 2) The Project is being constructed using state or local funds only (i.e., no federal funds).
- 3) The overall size, scope, sequencing, logistics or other aspects of the Project make it particularly challenging to manage, and use of a PLA is expected to help assure that the construction work is performed properly and efficiently under the circumstances.
- 4) The duration of construction activity on the Project is expected to exceed one construction season (i.e., 110 or more working days), or the nature of the Project results in a heightened need for labor force continuity and stability over a substantial period of time.
- 5) There is a firm construction completion date established for the Project thereby increasing the adverse consequences of any work stoppage or other labor disruption.
- 6) The time required to complete the Project is expected to extend beyond the expiration date of one or more existing collective bargaining agreements covering trades likely to be involved in the Project, thereby increasing the likelihood of work stoppage(s) or other labor disruption(s) during construction of the Project.
- 7) In the absence of a PLA, there is an increased likelihood of jurisdictional disputes among unions or of conflict between unionized and non-unionized workers on the Project that could have a potentially material adverse effect on the time, cost, or quality of work performed on the Project.

FAU Route 5756 (3rd Avenue)
Contract Number 64J68
Rock Island County
Item N/A

- 8) This project presents specific safety concerns to the traveling public and a PLA, will ensure labor force continuity and stability, decreasing the length of the safety concern
- 9) Use of a PLA is expected to result in improved access to skilled labor, improved efficiency, or improved safety performance on the Project
- 10) Use of a PLA on the Project is not expected to have a material adverse effect on the competitive bidding process
- 11) Use of a PLA on the Project is not expected to have a material adverse effect on the ability of the Department to achieve other Departmental goals (e.g., utilization of disadvantaged businesses, utilization of Illinois domiciled businesses, development of competitive vendor alternatives over time, etc.)
- 12) There are other material considerations favoring or disfavoring use of a PLA on this Project as follows:

Based upon the identified considerations, we recommend that you approve use of a PLA on this Project. Upon your approval, the Department shall undertake to negotiate in good faith a PLA with the relevant labor organization(s), and shall include in all necessary bid specifications and other documents information regarding the actual or form of PLA that is to binding upon all contractors and their employees

Attachment A

Justification for use of Project Labor Agreement (PLA) on Contract #64J68, Rock Island County

The use of a PLA on this project is consistent with all State and Local statutory and regulatory requirements.

Item 2 This project is federally funded

Item 3: Estimated project cost is \$7,297,000.00

This project involves the reconstruction of 3rd Avenue (River Drive) from 19th Street to 23rd Street in Moline.

Any disruption in the continuity of this project due to labor issues would result in delayed deadlines that could cause safety concerns for the traveling public because of incomplete reconstructed pavement lanes. Lapsing trade contracts during the project could be addressed through the use of a PLA. It is the Illinois Department of Transportation's finding that the large workforce needed for this project can be provided by the union trades involved and is a necessary requirement of a PLA.

Item 5 This project will have a completion date of December 6, 2014. Fifteen additional working days will be allowed in 2015 for landscaping and punch list work.

Item 8: Any disruption to the Contractor's schedule due to labor issues may result in the delay of the project completion date and lengthen the time for lane closures. The roadway will be closed during the reconstruction of the roadway and will require the detouring of existing traffic. This diversion of traffic, especially if left over the winter months, may contribute to additional exposure to crashes through the work zone and on the detour route.
