Date.	April 4, 2013		
Re	IL 37, Contract Number 78317, Franklin County		
	()		
that a p	ordance with the Project Labor Agreement Act (30 ILCS 571), it is recommended project labor agreement (PLA) be utilized for the above-captioned Project. This mendation is based on the considerations indicated below.		
_\(\sum_1\) The Project is being awarded and administered by IDOT (i.e., not by another governmental agency)			
2) The Project is being constructed using state or local funds only (i.e., no federal funds)			
make ı	B) The overall size, scope, sequencing, logistics or other aspects of the Project t particularly challenging to manage, and use of a PLA is expected to help assure a construction work is performed properly and efficiently under the circumstances		
△ 4) The duration of construction activity on the Project is expected to exceed one construction season (i.e., 110 or more working days), or the nature of the Project results in a heightened need for labor force continuity and stability over a substantial period of time			
	There is a firm construction completion date established for the Project therebying the adverse consequences of any work stoppage or other labor disruption		
_ ☐ 6) The time required to complete the Project is expected to extend beyond the expiration date of one or more existing collective bargaining agreements covering trades likely to be involved in the Project, thereby increasing the likelihood of work stoppage(s) or other labor disruption(s) during construction of the Project.			
7) In the absence of a PLA, there is an increased likelihood of jurisdictional disputes among unions or of conflict between unionized and non-unionized workers on the Project that could have a potentially material adverse effect on the time, cost, or quality of work performed on the Project			

Contract Number 78317 Franklin County Item

	s project presents specific safety concerns to the traveling public and a PLA, abor force continuity and stability, decreasing the length of the safety			
	of a PLA is expected to result in improved access to skilled labor, improved or improved safety performance on the Project			
	e of a PLA on the Project is not expected to have a material adverse effect on ive bidding process			
_X_11) Use of a PLA on the Project is not expected to have a material adverse effect on the ability of the Department to achieve other Departmental goals (e.g., utilization of disadvantaged businesses, utilization of Illinois domiciled businesses, development of competitive vendor alternatives over time, etc.).				
_\(\sum_12\) The this Project a See Attachm				
on this Proje faith a PLA specification	the identified considerations, we recommend that you approve use of a PLA ect. Upon your approval, the Department shall undertake to negotiate in good with the relevant labor organization(s), and shall include in all necessary bid is and other documents information regarding the actual or form of PLA that upon all contractors and their employees

FHWA conc	Saral KUMAAN, GY. Asilbut surrence in the PLA for the above mentioned contract			
	Gregory Nadeau, Deputy Administrator of FHWA See Approval Dated 5/09/13			

Attachment A:

Justification for use of Project Labor Agreement on Contract # 78317, Franklin County.

The use of a Project Labor Agreement on this project is consistent with all State and Local statutory and regulatory requirements

Item 2: This project may include Federal Funds

Item 4: The contract has 80 working days and will likely not be awarded and executed soon enough to allow for 80 working days in 2013

Item 6: The following Union Contracts will expire during the construction of this contract

Operators union – expired March 31, 2013, negotiations are ongoing

Iron Workers - will expire March 31, 2014

Item 8: In order to maintain traffic during construction, lane closures, temporary signals and uneven pavement will be required on ILL 37. These temporary conditions, while necessary during construction, pose a safety hazard to the traveling public. This hazard can be mitigated by minimizing the time that these temporary conditions are in place.

Item 12: In addition, user delay costs would be incurred from traffic operating at reduced speeds due to lane closures, temporary signals and reduced speed zones. Using a cost of \$15.65 per hour user delay cost for passenger vehicles and \$26.05 per hour user delay cost for trucks, the following daily delay costs are calculated.

ILL 37

Trucks - 210 trucks/day 0 05 hours delay/vehicle x \$26 05 = \$275 per day

Passenger Vehicles - 5,290 cars/day 0 05 hours delay/vehicle x \$15 65 = \$4,140 per day

Total user delay cost for work stoppage = \$4,415 per day

Traffic counts from IDOT 2011 statewide counts

User delay costs from "Life Cycle Cost Analysis in Pavement Design", FHWA, September 1998, adjusted to 2009 Consumer Price Index

The trades that will be used on this project include but are not limited to the following. Laborers, Carpenters, Operators, Teamsters, Cement Masons, Electricians, and Ironworkers.
