

CONTRACT NO. 95514

NOTES

Hollow structural steel tubing shall conform to the requirements of ASTM designation A-500 Grade B Structural Steel Tubing and shall meet the longitudinal CVN requirements of 15 ft-lbs at 0° F.

All other steel shapes and plates shall conform to the requirements of AASHTO M-270, Grade 36 except posts and angles shall conform to AASHTO M-270, Grade 50.

Bolts, cap screws, and nuts shall conform to the requirement of ASTM designation A-307 except for High Strength bolts, nuts and washers noted which shall conform to AASHTO M-164.

All bolts, nuts, cap screws, washers and lock washers shall be galvanized in accordance with AASHTO M-232.

All posts, railing, rail splices, end sections, anchor devices and angles shall be galvanized after shop fabrication in accordance with AASHTO M-111 and ASTM A-385. Galvanized rail shall not be painted.

Railing shall be in accordance with Section 509 of the Standard Specifications, except as noted, and will be paid for at the contract unit price per foot for STEEL RAILING, TYPE SI (SPECIAL).

All field drilled holes shall be coated with an approved zinc rich paint before erection.

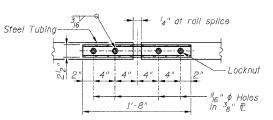

Any steel shape in contact with concrete shall receive two coats of asphalt paint conforming to Section 1060.07 Type II or place 18" fabric bearing pad between the steel and concrete.

The $^{3}_{4}$ " ϕ high strength bolts used to connect the 6 x 4 x $^{3}_{4}$ angles to the post shall be tightened in accordance with Article 505.04(f)(2) of the Standard Specifications. The I" ϕ High Strength bolts connecting the angles to the concrete shall be tightened to a snug fit and given an additional $\frac{1}{8}$ turn. The $\frac{5}{8}$ " ϕ cap screws in bottom of the posts shall be tightened to a snug fit only.

For Multi-span bridges, sufficient l_4 "x6"x1'-2" galvanized steel shims shall be provided to align rail between adjacent spans. Cost included in the cost of STEEL RAILING, TYPE S1 (SPECIAL).
