IDOT PROJECT LABOR AGREEMENT DETERMINATION

To: Omer Osman, Secretary

From: Jose Rios, Region One Engineer

Date: 3/18/2022

Re: FAP 607 – US 52 over I-55, Contract Number 62H16, Will County

{Letting: June 17, 2022 Completion Date: July 31, 2023}

In accordance with the Project Labor Agreement Act (30 ILCS 571), it is recommended that a project labor agreement (PLA) be utilized for the above-captioned Project. This recommendation is based on the considerations indicated below.

- 1) The Project is being awarded and administered by IDOT (i.e., not by another governmental agency).
- 2) The Project is being constructed using state or local funds only (i.e., no federal funds).
- 3) The overall size, scope, sequencing, logistics or other aspects of the Project make it particularly challenging to manage and use of a PLA is expected to help assure that the construction work is performed properly and efficiently under the circumstances. See attachment A below.
- 4) The duration of construction activity on the Project is expected to exceed one construction season (i.e., 110 or more working days), or the nature of the Project results in a heightened need for labor force continuity and stability over a substantial period of time.
- 5) There is a firm construction completion date established for the Project thereby increasing the adverse consequences of any work stoppage or other labor disruption.
- 6) The time required to complete the Project is expected to extend beyond the expiration date of one or more existing collective bargaining agreements covering trades likely to be involved in the Project, thereby increasing the likelihood of work stoppage(s) or other labor disruption(s) during construction of the Project.
- 7) In the absence of a PLA, there is an increased likelihood of jurisdictional disputes among unions or of conflict between unionized and non-unionized workers on the Project that could have a potentially material adverse effect on the time, cost, or quality of work performed on the Project.

Fed. Proj. No. CONGEST/A ABV3 (073)

8) This project presents specific safety concerns to the traveling public and a PLA, will ensure labor force continuity and stability, decreasing the length of the safety concern.

9) Use of a PLA is expected to result in improved access to skilled labor, improved efficiency, or improved safety performance on the Project.

10) Use of a PLA on the Project is not expected to have a material adverse effect on the competitive bidding process.

11) Use of a PLA on the Project is not expected to have a material adverse effect on the ability of the Department to achieve other Departmental goals (e.g., utilization of disadvantaged businesses, utilization of Illinois domiciled businesses, development of competitive vendor alternatives over time, etc.).

12) There are other material considerations favoring or disfavoring use of a PLA on this Project as follows:

Based upon the identified considerations, we recommend that you approve use of a PLA on this Project. Upon your approval, the Department shall undertake to negotiate in good faith a PLA with the relevant labor organization(s) and shall include in all necessary bid specifications and other documents information regarding the actual or form of PLA that is to binding upon all contractors and their employees.

Attachment A

The use of Project Labor Agreement (PLA) for Contract 62H16 is consistent with all State and Local statutory and regulatory requirements.

Item 3: This project includes both State and Federal funding and the programmed cost for this project is estimated at \$5,000,000.

The existing bridge center median will be removed to provide room for side-by-side left turn lanes which will include removal of concrete median, traffic signal modifications, bridge deck repairs and ¾" deck scarification and 2 ¼" Latex Concrete overly with slight roadway profile improvement. Additional bridge structure maintenance is needed as well and includes expansion joint replacement and structural repairs. Additionally, the ramps will be widened to provide an additional turn lane to increase safety. Traffic signal modernization and lighting upgrades will be installed at both ramps as part of this project. The NE/SE Frontage Road will also be widened to increase safety and will also include traffic signal improvements. Profile changes will be minimal. The intersection of US 52 and the NE/SE Frontage Road is PCC, while the roadway extension itself is HMA. Concrete shoulder is proposed as part of the widening improvement. Drainage improvements are planned to accommodate the widened roadway and maintain existing.

The project is located in the Village of Shorewood, Will County, Illinois.

Item 5: The completion date is July 31, 2023 plus 5 working days for punch list and clean-up items.
