Provide 3 wire ties and guys of 2-strand, twisted, plicable galvanized iron wire, not lighter than 14 ga, with zinc-coated turnbuckles. Provide not less than 1/2 inch diameter rubber or plastic hose, cut to required lengths and of uniform color, material, and size to protect tree trunks from damage by wires.
- Provide 2"x3"x 24" (min.) wood stakes equidistant from plant trunk. Provide protective markings to cables and stakes as approved by the Engineer. This shall be incidental to cost of the tree.

3. MULCH

- A. Mulch all plantings with shredded hardwood bark mulch to a depth of 3''.
- B. Mulched beds shall encompass all groups of plant material and be generous enough to permit ease of landscape maintenance.
- C. Mulch rings shall be a minimum 5'-0" diameter for individual trees, evergreens and ornamental trees as shown on the plans or directed by the Engineer.
- D. Mulch areas between groundcover and perennial plants; place not less than 3 inches thick.

- 4. MAINTENANCE
- A. Begin maintenance immediately after planting.
- B. Maintain trees, shrubs, and other plants until final acceptance by th Engineer.
- C. Maintain trees, shrubs, and other plants by pruning, cultivating, and weeding as required for healthy growth. Restore planting saucers. Tighten and repair stake and guy supports and reset trees and shrubs to proper grades or vertical position as required. Restore or replace damaged wrappings. Spray as required to keep trees and shrubs free of insects and disease.
