#### STATE OF ILLINOIS DEPARTMENT OF TRANSPORTATION

\* Granular or solid flux filled headed studs conforming to Article 1006.32 of the Std. Specs., automatically end welded.

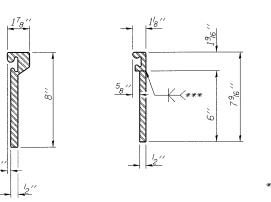

after forms are removed, typ.

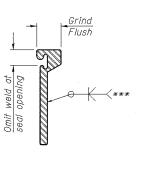

Strip seal— Locking edge rail — Top of slab at 1'-0" cts. at 2'-0" cts. Anchor plate Place plates at 1'-0" cts.  $^{7}_{16}$  "  $\phi$  holes at 4'-0" cts. for  $^{3}_{8}$  "  $\phi$ (alt. with top horizontal studs)

bolts. All bolts shall be burned, sawed, or chipped off flush with the plates after forms are removed, typ.

# SECTION THRU ROLLED RAIL JOINT

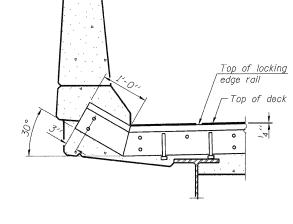

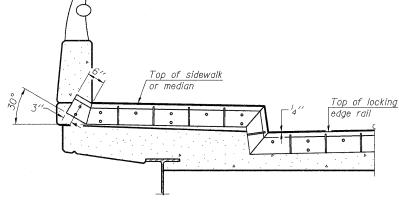

\*\*\*Back gouge not required if complete joint penetration is verified by mock-up.

ANCHOR P (for welded rail)

## SECTION THRU WELDED RAIL JOINT

The strip seal shall be made continuous and shall have a minimum thickness

of  $\frac{1}{4}$ ". The configuration of the strip seal shall match the configuration of the

Locking Edge Rails. Open or "webbed" strip seal gland configurations are not permitted. The gland shall be sized for a maximum rated movement of 4 inches.

The height and thickness of the Locking Edge Rails shown are minimum dimensions. The actual configuration of the Locking Edge Rails and matching

The manufacturer's recommended installation methods shall be followed.

All steel components shall be galvanized after fabrication according to

The joint opening and deck dimensions detailed on the superstructure are based on a rolled rail expansion joint. If the Contractor elects to use the welded rail expansion joint, the opening and deck dimensions shall be modified according to the dimensions detailed on this sheet. Required modifications

strip seal may vary from manufacturer to manufacturer. Flanged edge rails will not be allowed. Locking Edge Rails may be spliced at slope discontinuities

AT PARAPET

#### AT SIDEWALK OR MEDIAN

Shorter plates with a single row of studs at 12" cts. may be necessary on medians which are shallower than 9". See manufacturer's recommendation.

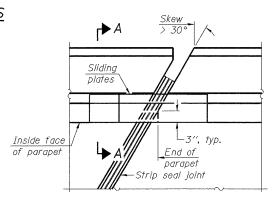

#### EXTRUDED RAIL WELDED RAIL

ROLLED

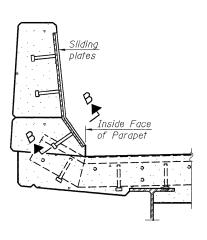

#### LOCKING EDGE RAIL SPLICE

The inside of the locking edge rail groove shall be free of weld residue.
