When "A" is 3'-6" or less, the temporary concrete
barrier shall be anchored to the new slab according
to Detail I or Detail II. No anchorage is required
when "A" is greater than 3'-6".

****3" min.

EXISTING SLAB

Stage removal line
1'-10½"

****4" max.

EXISTING DECK BEAM

SECTIONS THRU SLAB OR DECK BEAM

NOTES
Detail I - With Bar Splicer or Couplers:
    Connect one (1) 1" x 7' 'x "W" steel ℗ to the
    top layer of couplers with 2-⅝" φ bolts
    screwed to coupler at approximate ℄ of
    each barrier panel.
Detail II - With Extended Reinforcement Bars:
    Connect one (1) 1" x 7" x "W" steel ℗ to the concrete
    slab or concrete wearing surface with 2-⅝" φ
    Expansion Anchors or cast in place inserts
    spaced between the top layer of reinforcement
   at approximate ℄ of each barrier panel.
Cost of anchorage is included with Temporary Concrete Barrier.
The 1" x 7" x "W" plate shall not be removed until stage II construction
forms and all reinforcement bars are in place and the concrete is ready
to be placed.

*** Dimension shown is minimum required embedment into concrete.
    If hot-mix asphalt wearing surface is present, minimum embedment
   shall be in addition to wearing surface depth.

**** If existing deck beam is to remain in place after stage construction,
    embedment shall only be into wearing surface and not
    into existing deck beam concrete.

**Wood blocks
