250.00

Designer Note: Use for seeding small disturbed areas. <u>Discuss with the District Landscape</u> Architect before using.

Consider EROSION CONTROL BLANKET, and make this work incidental to the EROSION CONTROL BLANKET if cover is required. Do not mulch if EROSION CONTROL BLANKET is used.

## **SEEDING, MINOR AREAS**

Effective July 1, 1990 Revised January 1, 2007

Seeding, fertilizing, and mulching shall be done in accordance with <u>Article 250</u> of the Standard Specifications except for the following revisions:

All areas disturbed by the work performed shall be seeded, fertilized, and mulched in accordance with Article 251.03(a). The materials may be purchased locally and placed as directed by the engineer.

The estimated area is approximately <u>acres (hectare)</u>. The seed mixture shall be applied at <u>100 pounds/acre (110 kg/ha)</u>. The mixture shall be one that contains a high percentage of Kentucky Blue Grass. All seeds shall meet the purity and noxious weed requirements of <u>Article 1081.04</u> of the Standard Specifications, and be approved by the engineer.

The fertilizer nutrients shall be applied at a rate of <u>270 lbs. (300 kg)</u> of actual nutrients per <u>acre</u> (<u>hectare</u>). The fertilizer furnished shall be ready mixed material having a ratio of (1-1-1).

The Contractor shall provide the engineer with the test results from the seed container and the chemical analysis of the fertilizer nutrients.

The seed, fertilizer, and mulch will not be measured for payment but will be considered included in the cost of \_\_\_\_\_.

<sup>\*</sup>Figure approximate acres (hectare).

<sup>\*\*</sup>Make everything incidental to one specified item of work.
