

Question: For Item #12, could IDOT provide the roadway limits? The project mentions the structure over Blackberry Creek but if the additional roadway limits (and or length) could be included, that would greatly improve our teaming and approach abilities.

Answer: On US 30 the limits are west of Griffin Dr to west of the IL 31 interchange.

On Orchard Rd the limits are approximately 1,400 ft along the south leg and 2,200 ft along the north leg.
