

SAFE DRIVING REQUIRES THAT YOU:

- (1) **DRIVE DEFENSIVELY** — Expect the unexpected. Be prepared to compensate for the driving errors of others. Communicate with other motorists — use your signal lights.
- (2) **DRIVE COURTEOUSLY** — Let the other driver have the right-of-way even when you know you are right.
- (3) **DRIVE SKILLFULLY** — Most people know the rules of good driving, but don't take the time to use them. Put all your driving skills into practice every time and all the time you drive.
- (4) **DRIVE WITH SELF-CONTROL** — Don't drive when you are highly irritated, emotionally upset, tired, or if you have been drinking. Don't daydream, and if you are on a long monotonous stretch of pavement, watch out for highway hypnosis.
- (5) **DRIVE WITH A SAFE CAR** — Have your car safety checked at frequent intervals. Pay special attention to brakes, steering mechanism, tires, windshield wipers, rear view mirrors, lights and horn.
- (6) **DRIVE WITH A PLAN** — Know your route. Avoid split-second decisions. Always allow adequate time for your trip.
