

District 2 Crash Data Control Setup

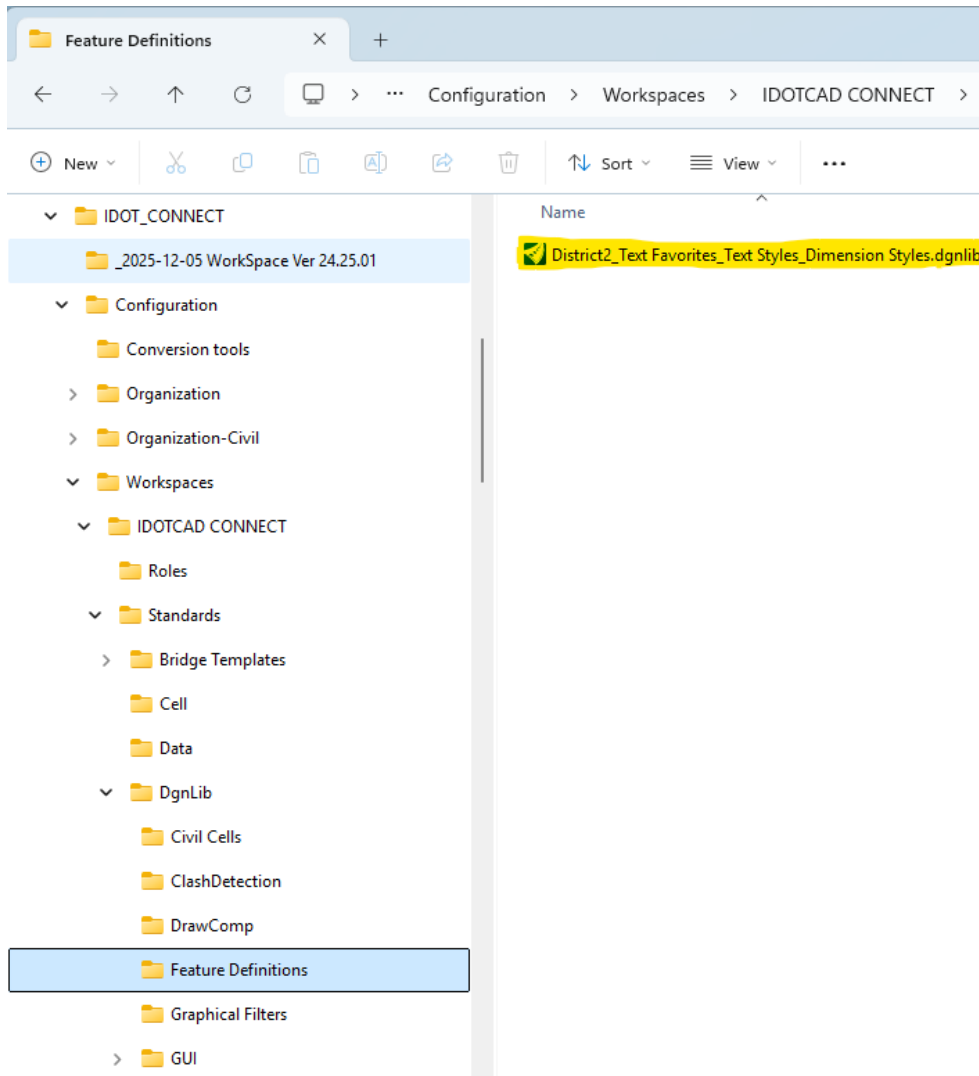

1 The following outlines the steps for setting up the files to be used with the District 2 “CrashData.mvba” to place the project accident crash data in a dgn file.

- 1) Copy the “CrashData.mvba” and “CrashData.pdf” files to “....\IDOT_CONNECT\Configuration\Organization-Civil\IDOT_Standards\Macros” folder.

District 2 Crash Data Control Setup

- 2) Copy the “*District2_Text Favorites_Text Styles_Dimension Styles.dgnlib*” file to “.....\IDOT_CONNECT\Configuration\Workspaces\IDOTCAD CONNECT\Standards\DgnLib\Feature Definitions” folder.

Where is the drive location of the “IDOT_CONNECT” folder.

- 3) The “*CrashData.mvba*” application is activated by using the following key-in command:

vba run [CrashData]modCrashData.Start

- 4) Refer to the “*CrashData.pdf*” file for the steps to use this application.
